

The easy feel of this coastal look is updated with modern elements such as the unconventional chandelier. The use of fair trade seagrass wall hangings and wooden vases add warm texture to the clean lines of the furniture. This relaxing design, with its shades of blue, is reminiscent of our hometown by the ocean.

Candelabra likes to design with personality. We like to add a surprise element, like our cheerful brass stool, to show our quirky side in every design.

We are never afraid to add something unique to a sophisticated style, which is how we achieve a playful yet elegant space.

The selection of the bedding is a twist on traditional and is complemented by the relaxed bohemian look of the chandelier.

Candelabra's signature approach is always adding pops of unexpected color. This mixture elevates a simple layout into high style design.
