Synagro to Be Featured on Upcoming Episode of DMG Productions' *American Farmer*

Focus Will Be on Synagro's Mission to Be the Most Trusted Provider of Resource Recovery Solutions

BALTIMORE, Maryland, March 6, 2018 – [Synagro Technologies, Inc.](http://www.synagro.com), one of the largest private composters in the United States, is pleased to announce its participation in an episode of *American Farmer* currently scheduled for broadcast in the third quarter of 2018. The show will take a look at how Synagro applies its expertise and innovative technologies to help municipalities and industrial customers across the country transform natural-waste challenges into sustainable solutions.

"As more and more communities make the decision to recover plant nutrients, organic matter and energy from society's organic waste streams, Synagro is well-positioned to assist them in carrying out these very important initiatives," said Bob Pepperman, director, Product Sales & Marketing, Synagro. "Whether through one of our nine Granulite® fertilizer plants or our six AllGro® compost production facilities, Synagro recycles the valuable components of these waste streams in ways that are both environmentally sound and economically efficient."

Viewers will learn about Synagro's certified agronomists, horticultural experts and crop advisers, and how, by understanding commercial and consumer needs, the company is able to produce cost-effective products that work.

"As the preeminent provider of biosolids and residuals solutions, Synagro believes in serving its customers and communities in a transparent and collaborative way," said Jennifer Tierney, senior producer, *American Farmer*. "We look forward to bringing this topic to light."

About American Farmer

American Farmer is a breakthrough program on a mission to showcase the latest advancements in agriculture and farming. From seed to harvest, livestock and more, our producers have traveled the country covering the people, places and issues impacting all areas of farm country. American Farmer airs Tuesdays at 8:30 a.m. ET on RFD-TV. Check your local listing for show times.

About Synagro

Founded in 1986, Synagro Technologies, Inc. provides environmentally sustainable solutions for commercial and municipal organizations that generate organic by-products. Synagro consistently transforms industrial and municipal waste into environmentally friendly resources that benefit our

communities. As the largest recycler of organic by-products in North America, Synagro uses best-in-class processes, from beneficial reuse to renewable energy, that adhere to the strictest of environmental regulations to provide compelling solutions for communities across the continent. Serving more than 600 municipal and industrial water and wastewater facilities in the United States and Canada, Synagro's leading systems of organic by-product management services support municipalities of all sizes in saving money and meeting environmental regulations.
