

ABOUT PIXOASIS

Welcome to PixOasis, your happy haven for image delivery.

Designed by photographers for photographers, we understand the importance of smooth workflow: shoot, edit and deliver. For many of us, we shoot with Canon and Nikon; we edit with Adobe and others. But when it comes to delivering our assignments, we photographers often find ourselves scrambling for a solution. FTP programs are difficult to use, large file transfer sites like Dropbox and Box are clunky to use and aesthetically unappealing. Also, they do not offer the specialized features we so often require. And thus, PixOasis was born.

Fast, efficient and easy-to-use, PixOasis gives photographers the ability to send images and videos seamlessly in a web gallery format. Clients don't have to struggle just to view and edit photos.

With PixOasis:

- Clients click your link and see a gallery of your images or videos instantly.
- You can deliver multiple albums of images or videos with one link.
- You control how long your links stay active
- Using our Adobe Lightroom Plugin, saves you time by exporting directly to your PixOasis galleries.
- Your clients can edit your images online and share these edits with their colleagues.
- You brand your galleries by adding your logo to all your deliveries
- Help is available with live phone tech support.

Helping photographers to be the most effective and the most successful in their field is our primary goal. We are constantly asking for user suggestions to continually improve our service.

Since launching, PixOasis has grown virally with thousands of photographers delivering their photos to over 100 countries. We are evolving with the ever changing professional photography universe.

PixOasis is poised to become the #1 image and video delivery solution for professional photographers all over the world.

Join us and find your happy with PixOasis!
