Bridgeforce Data Quality Solutions, LLC announces PCI-DSS Compliance Certification

The Bridgeforce® Data Quality Scanner® Solution (DQS), the leading automated credit reporting data accuracy tool, is now available in the cloud.

Chadds Ford, PA March 9, 2018 – Bridgeforce Data Quality Solutions, an organization that delivers enterprise-wide data quality products and services, has announced recent enhancements to the Bridgeforce® Data Quality Scanner® Solution (DQS), including the launch of a PCI-DSS certified cloud environment.

Licenseses can now access DQS in a robust and secure environment that has the “look and feel” of an on-premise deployment with less overhead. The cloud-based solution will allow furnishers to shift the burdens of server setup and configuration, environment resource management, and managing product upgrades to Bridgeforce. This advancement will streamline furnishers’ ability to find and address credit reporting discrepancies. To best support all clients, on-premise installations will continue to be available.

“The offering of DQS via the cloud opens up tremendous opportunity to the industry to facilitate accurate reporting of data, while promising security and speed,” said Noah Stayton, Director of Data Quality Solutions at Bridgeforce. “Multiple organizations have already recognized and acted on the need for enhanced credit reporting solutions. They’re using the DQS to identify discrepancies for remediation, and to validate data accuracy before furnishing to CRAs.”

Credit Reporting Compliance Across the Industry

Bridgeforce is proud to partner with a variety of institutions on their journey to improve data accuracy, reduce the potential for consumer harm, and minimize regulatory risk, including the following:

The Carrington Mortgage Services, LLC, First Investors Financial Services, Inc., KeyBank National Association, Limestone Bank, Merrick Bank, and Westlake Services, LLC logos are registered trademarks and are owned by and/or which rights belong to their respective companies and/or their affiliates, and are used herein with their consent. About Bridgeforce® Data Quality Scanner® (DQS) Solution

The Bridgeforce® Data Quality Scanner® (DQS) Solution is the only tool in the industry tailored specifically to help data furnishers achieve enterprise-wide accuracy and compliance with Metro 2®. We are proud to offer white-glove implementation and full-service consulting support as well as month-over-month tracking. Our goal is to ensure a seamless integration with ongoing support, so your enterprise has the confidence to grow and succeed across the board.

Compliance audits will be simplified, customer disputes should be lessened, and the once-tedious process of auditing files has been pared down to a single-source-of-truth report.

The Bridgeforce® Data Quality Scanner® (DQS) Solution is a new industry standard: diligent on credit reporting accuracy so you can breathe easier.
