

Complete Over The Road Transportation Management

Cerasis adds Enterprise Parcel Shipping Management with the Cerasis Rater powered by Transtream

Most shippers struggle with fragmented shipping data, runaway costs, and limited resources to manage all over the road shipping modes.

Shippers now have the control they need to manage all over the road shipment modes with the launch of the Enterprise Parcel Shipping Solution capability now available in the Cerasis Rater transportation management system (TMS) to gain greater control and better visibility for the over the road transportation modes.

Full features of the multi-parcel carrier shipping solution in the Cerasis Rater:

- **Schedule Parcel shipments** in the same portal where you schedule LTL & Full Truckload
- **Choose from multiple parcel carriers** by price and transit time, including UPS, FedEx, USPS, and regional carriers
- **Compare parcel and LTL modes** per 100 weight in real-time and choose which is best for your shipment
- **Configure shipping & handling costs** in admin mode to ensure proper shipping & handling costs for your customer are added to each shipment
- **See all over the road transportation mode shipping activity** for analysis in order to optimize all shipping
- **Gain access to value-added services** to manage shipping exceptions such as freight claims & accounting
- Access to intercontinental & international **air freight services**
