

Activate Partner Program Guide

Grow With Ziften

Joining Ziften's Activate Partner Program equips you to accelerate new business opportunities and expand existing business with powerful security solutions for customers. Support more of your customer's environment and close more sales with a secure, SaaS based security solution for any customer endpoint, virtual machine, or cloud deployment. Built on a scalable and continuous architecture, joining the Ziften ecosystem helps increase virtually every sale, and strengthen every customer relationship. Success starts with a shared vision and hands-on partnership. Join Ziften's Activate Partner Program and start growing with us today.

Why Partner With Ziften?

With Ziften, partners can offer a broad range of security and operations capabilities that easily fit with their existing solutions and services. Ziften equips partners with:

- Innovative, channel ready products and solutions to differentiate and grow your business
- Security for more of your customer's environment endpoints, servers, and cloud
- Visibility and security for your customer's complex, multicloud deployments
- Support of more customer stakeholders from security to DevOps teams
- Simple security tool integrations to deliver truly custom, differentiated solutions
- Hands-on, personalized support and life-cycle expertise

Our hands-on approach and broad ecosystem helps open more doors and close more deals. To learn how Ziften can help you solve your customers biggest business challenges give us a try.

We'll help you grow with Ziften!

Be Part of Our Broad Partner Ecosystem

Reseller partners that package, promote, sell, deliver, and support winning solutions.

Distributors that further promote and support Ziften and reseller success.

Managed service providers that provide turnkey security services and delighted customer experiences.

Technology partners that collaborate to offer joint solutions increasing customer value, and lowering customer total cost of ownership.

Membership Overview

Ziften's Activate Partner Program features three flexible tiers – Gold Partners, Silver Partners, and Authorized Partners – to meet partners' desired level of access and support.

Gold Partners

are proven experts in delivering Ziften solutions and have demonstrated consistent success and the ability to support all customer use cases. They have experts on staff to suit any complex deployment and deliver excellent levels of customer support.

Silver Partners

have proven success with Ziften and are committed to continued growth with Ziften solutions. They deliver the full Ziften solution set and are certified to assist with a variety of deployment needs. They are recognized for great customer support.

Authorized Partners

are starting their relationship with Ziften. They deliver superior security solutions and possess staff knowledgeable on customer use cases and needs. Authorized partnership has minimal requirements to allow new partners to start growing with Ziften.

Membership Has Its Privileges

Being in the Activate Partner Program helps accelerate new opportunities and expand existing business. The program delivers powerful financial incentives and enablement programs that fast-track growth and reward success.

Deal Registration: Register new opportunities to gain deal protection and increased incentives

Hands-on Partnership: Field sales and sales engineers drive new opportunities and support pre-sales activities

Demo Software: Demo software and backend environments to easily demonstrate the value proposition to customers

Guaranteed High Margin Sales: Cloud-based software security solutions solving high-value customer needs

Market Development Assistance: Initiatives and funds available to drive incremental demand and lead generation

Flexible Training: Webinars, online and in-person classes, technical courses, and certification

Solutions Fit for Your Business

Ensuring endpoints are reliable, safe, and secure increases the value of customers' relationship with you.

All-the-Time Visibility and Control

 We mean all-the-time – continuously streamed visibility into client device, server, virtual machine and cloud activities

Endpoint Detection and Response

- Enables customers to detect, view, investigate, and respond to advanced cyber-attacks
- Cloud powered to deliver behavioral and machine learning detection analytics
- Investigate forensic evidence to uncover the scope of any breach, and respond to contain and eliminate attacks

Cloud Visibility and Security

- See what's happening in, and secure multi-cloud, Windows and Linux-based environments
- Cloud-powered security supporting the most highly complex, multi-cloud enterprise environments

Posture Monitoring and Hardening

- Find unmanaged assets and reduce the number of noncompliant assets connecting to the network
- Continuously monitor and improve the vulnerability state of assets reducing the attack surface
- Proactively find and fix performance impacting issues

© Copyright 2018 Ziften Inc. Ziften delivers all-the-time visibility and control for any asset, anywhere - client devices, servers, and cloud VMs – whether on-network or remote; connected or not – for large and mid-sized enterprises, governments, and managed security service providers (MSSP).
