

Corrosion Resistant Coatings & Linings Application

Allied has provided professional, safe and efficient on-site services to the petrochemical and manufacturing sectors for more than 30 years. Allied's comprehensive services allow us to take tank and pipeline re-coating/lining projects from start to finish.

COMPLETE PROJECT CAPABILITY

one contractor - one schedule - one invoice

Evacuation - Cleaning

Isolate/blank and take out of service
Evacuation and product transfer
Setting legs / entry prep

Cleaning (hydro blasting)
Hydro testing
Waste transport (haz & non-haz)

Blasting - Surface Preparation

Commercial blast (SP-6)
Inspection blast (SP-7)
Near white metal blast (SP-10)
White metal blast (SP-5)

Pre-blast salt/chloride testing
Weld treatment & spatter grinding
Pitting abatement/filling
Waste removal and transport

Coating Application - QA/QC

Steel and concrete substrates
Plural system applications
100% solids, phenolic, epoxy & siloxane coatings
Continuous monitoring of ambient conditions

Weld & seam stripe coating
Continuous thickness monitoring
Adhesion testing
Holiday/pinhole testing

Return to Service

Replace manways
Remove blanks/blinds

Install valves and connections
Final verification with owner

- ✓ **Confined space entry & rescue certified**
- ✓ **OSHA 40-hr HAZWOPER certified**
- ✓ **NACE-trained crews**
- ✓ **ISNetworld, PEC Safety, BROWZ, & Avetta approved**
