🐦 **/SocialHealthReg**

**SHR is a tool to empower socially responsible individuals in the dating world.**

We currently provide a web application that allows registered users to upload their negative STD/STI test results, have them validated in the backend, and share their profile with potential sexual partners. The goal is to positively influence human behavior in ways that will mitigate the rise of STDs and STIs.
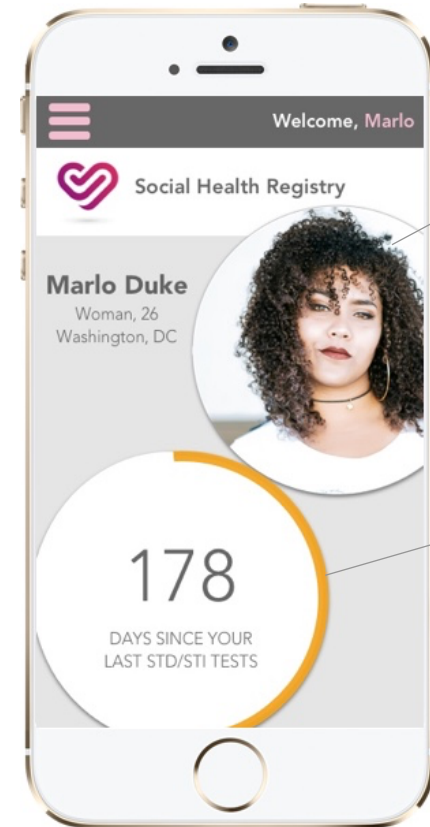

**①** *Are you a socially responsible citizen?*

**②** *Do you take your sexual health seriously?*

**③** *Do expect the same behavior from your partners?*

*Create a profile or learn more by visiting*
