Corporate Executive Brief

About DOMA

Using our FedRAMP accredited cloud technology platform as the core enabler, we create integrated end-to-end solutions around information management. Our approach is unlike the traditional legacy vendors since DOMA can provide more targeted microsolutions that are competitively priced and aimed at a quicker deployment, implementation, and return on investment. We work with customers to extract the most value out of their business content and do it through our cloud software platform and digital automation services.

As an ISO 9001:2015 registered company, we have spent the last two decades focusing on a quality, security, and value for our Federal clients, commercial customers, and teaming partners.

DOMA's Engagement with the Federal Government

DOMA has been a trusted partner of the Federal Government for the last 17 years. We built the company with a focus on customer service, compliance, and quality while building a reputation of a group that is easy to do business with. Past Performance with smaller specialized projects through high volume, complex engagements has taught DOMA valuable lessons with regards to effective pricing, efficient project management, agile development of software and services, and success in meeting customer requirements. As we move into 2018, innovation will be at the forefront to meet ever-changing mission goals as government agencies attempt to modernize. Below is a small sampling of a handful of use cases where we have been a valuable partner with the Federal Government.

Dept of Veterans Affairs	Project Title	Business Use Case	Description
Veterans Benefits Administration (VBA)	Private Medical Records (PMR)	Claims Development	Mailroom, Document Review, and Quality Assurance services facilitate the centralized retrieval, assembly, workflow, and secure transmission of documentation through a Cloud software platform.
