## MyTana Manufacturing Releases Drain Service Notepad

*Free giveaway facilitates communication between drain cleaners and their customers and serves as a user-friendly leave-behind.*

ST. PAUL, MN—April 26, 2018— MyTana, a manufacturer and distributor of cleaning, maintenance and inspection tools for the plumber and drain cleaning markets, has released a Drain Service Notepad to facilitate communication between industry professionals and the homeowners they serve. Plumbers and drain cleaners can use the notepad to explain plumbing configurations and indicate what and where problems are in the home. The notepad also features space for notes, work estimates and contact information, making it an easy-to-use leave-behind.

The Drain Service Notepad's diagram of a household plumbing system includes key features, such as a main stack, various trap and vent configurations, cleanouts, check valve, and common fixtures and appliances. It also demonstrates common improper or illegal plumbing features including S-traps and U-traps, as well as an illegal downspout connection.

"The average person doesn't generally know much about plumbing or how household systems are laid out," says Nicole Lygo, a member of MyTana's Marketing Department. "We want to provide a way for plumbers and drain cleaners to illustrate plumbing problems for their customers. With this notepad, the diagram is there, allowing them to sketch problems right onto it."

The Drain Service Notepad is part of MyTana's ongoing commitment to provide practical tools for plumbers and drain cleaners, from pipe jettors and cable machines to marketing resources.

### **About MyTana Manufacturing**

St. Paul Minnesota-based MyTana is a full-service manufacturer of drain cleaning and inspection equipment, including cable machines, drain jettors and plumber cameras. The company also offers cables, blades, nozzles and other accessories for plumbers and drain cleaners.
