Synagro Makes Donation to Help Keep Bakersfield Beautiful

Annual Contribution Commitment to the Community Began When the South Kern Compost Manufacturing Facility Was Established

BALTIMORE, Maryland, May 1, 2018 – [Synagro Technologies, Inc.](#), the preeminent provider of biosolids and residuals solutions services in the United States since 1986, has donated \$5,000 to the 17th Annual Great American Cleanup event in Bakersfield, California. The event, a program of Keep America Beautiful, took place Saturday, April 21, 2018 and is organized by [Keep Bakersfield Beautiful](#), a not-for-profit environmental organization located in Bakersfield.

The donation is part the \$75,000 annual commitment Synagro made to Taft and the surrounding communities when it established the South Kern Compost Manufacturing Facility (SKCMF).

“The SKCMF facility leadership team evaluates all opportunities to determine which best support Synagro's vision a cleaner, greener world,” explained Robert Rankin, site manager, SKCMF, Synagro. “We support this event because it is about keeping our communities and our world clean through a day dedicated to community beautification.”

"This will be our fourth year participating," added Jamie Little, community engagement specialist, SKCMF, Synagro. "During that time, as many as 13 Synagro employees removed litter from abandoned alleys and lots, and we helped clean up a community garden by fertilizing, mowing, planting, raking and weeding."

The Keep America Beautiful Great American Clean Up is one of the largest community service events in the nation. As part of the Great American Clean Up and Keep Bakersfield Beautiful, SKCMF employees will be out with boots on the ground participating in graffiti removal, litter pick up and tree planting.

About Synagro

Founded in 1986, Synagro Technologies, Inc. provides environmentally sustainable solutions for commercial and municipal organizations that generate organic by-products. Synagro consistently transforms industrial and municipal waste into environmentally friendly resources that benefit our communities. As the largest recycler of organic by-products in North America, Synagro uses best-in-class processes, from beneficial reuse to renewable energy, that adhere to the strictest of environmental regulations to provide compelling solutions for communities across the continent. Serving more than 600 municipal and industrial water and wastewater facilities in the United States and Canada, Synagro's

leading systems of organic by-product management services support municipalities of all sizes in saving money and meeting environmental regulations. Visit synagro.com to learn more.
