

Crosser named by Gartner as a Cool Vendor in Edge Computing

Stockholm/Sundsvall, Sweden., May 9, 2018 - Crosser, a leading provider of Intelligent Edge Computing software for Industrial IoT, today announced it has been included in the "Cool Vendors in IoT Edge Computing, 2018" report by Gartner, Inc.

“

We're honored to be included in the Cool Vendor report by Gartner, which we believe is due to our innovation in user-friendly edge analytics and mass-orchestration of Edge Nodes," said Martin Thunman, CEO and co-founder of Crosser.

“

Crosser's modular, open and flexible Edge IoT solution solves the issue of being dependent on developers to build advanced Industrial IoT solutions. With an intuitive drag and drop builder, our customers quickly deploy advanced streaming data analytics in the edge. It also provides an option for enterprises that are not "cloud-ready" to gain all the advantages of Industrial IoT behind the firewall."

The Edge IoT Solution is ideally suited for machine and equipment manufacturers that want to enable advanced condition monitoring of their devices in the field and for a variety of other Industrial IoT and Factory 4.0 use-cases.

About the Gartner Report

The Gartner report "[Cool Vendors in IoT Edge Computing, 2018](#)" by analysts Aapo Markkanen, Tracy Tsai, Godfrey Chua, Nick Jones, Saniye Burcu Alaybeyi, was published on April 11, 2018.

Gartner Disclaimer

Gartner does not endorse any vendor, product or service depicted in our research publications, and does not advise technology users to select only those vendors with the highest ratings or other designation. Gartner research publications consist of the opinions of Gartner's research organization and should not be construed as statements of fact. Gartner disclaims all warranties, expressed or implied, with respect to this research, including any warranties of merchantability or fitness for a particular purpose.

About Crosser Technologies AB

Crosser designs and develops real-time software solutions for Edge Computing and next generation real-time Enterprise Integration. The Crosser Edge Computing solution offloads Cloud services, provides real-time data processing and decision making capabilities close to IoT sensors, devices and machines.

The software enables key use-cases such as Industrial IoT, Connected Machines, Predictive Maintenance, Industry 4.0 and real-time, event-driven Enterprise Integration.
