

SECURE.SYSTEMS

Secure.Systems™ Mobile App Workspace

Secure and enhance your enterprise app experience with Secure.Systems™, delivered from the Cloud

For more than a decade, mobile employees have been working with one hand tied behind their backs. The productivity and bottom-line benefits mobility originally brought have been cancelled out by overly-restrictive mobile security policies.

Secure.Systems™ removes those limitations, enabling unrestricted, unimpeded, and totally secure collaboration between mobile employees and their enterprise ecosystem. Secure.Systems™ is protected through a FIPS 140-2 compliant, AES 256-bit encrypted app container designed to secure data without any hindrance to application functionality.

Secure. Systems™ now available in a SaaS model.

SECURE.SYSTEMS

- Containerized, encrypted NIST-validated security
- Quick, easy deployment as managed service
- Integrated with Microsoft Office 365
- Integrated with Microsoft Intune EMM
- Simple subscription-based payment model
- Ability to easily upgrade or downgrade subscription
- Available in a free trial
- Same great functionality as SentinelSecure™ on-premise
- Available on Microsoft Azure, or directly from - <https://secure.systems>

Full Suite of Enterprise Apps on Mobile

A full suite of mobile-enabled productivity applications is available in Secure.Systems™:

Secure Enterprise Communications – Office 365 Email Client, Email Contacts, Calendar, Notes, Tasks

Secure Enterprise File Management – Briefcase, File Sync, DropBox, File Manager, Office Suite, SharePoint, Annotate, Secure Camera/Image Roll

Secure Internet/Intranet – Secure Browser, HTML 5 Hybrid Mobile App Frameworks, Enterprise IM, Secure Chat

Secure Location-based Services – Geo-location, GPS Tracking, Geo-fencing, Maps

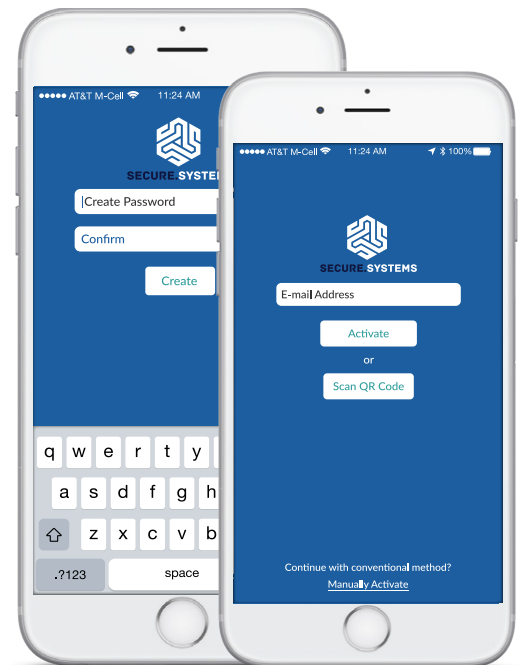

Secure.Systems™ can be procured through both direct and partner channels, including the Microsoft Azure App Services Portal. For licensing options, please visit <https://secure.systems/licensing-options>.

Greater Mobile App Functionality Complementing your EMM System

Secure.Systems™ comes with integration to a multitude of Enterprise Mobility Management (EMM) systems. With Secure.Systems™, you get a defense-grade containerized workspace that serves as a complementary layer of security to your existing EMM investment. Your mobile app workspace is fully integrated while your network perimeter remains secure.

Secure.Systems™ is currently integrated with Microsoft Intune, MobileIron, and many others.
