## MVP Systems Software Announces Partnership with DXC Red Rock

*MVP Systems Software has partnered with DXC Red Rock to bring smart workload automation to Oracle and JDE implementations in Australia & New Zealand*

**17 May 2018** – MVP Systems Software, Inc., a leading provider of enterprise job scheduling and workload automation software, and DXC Red Rock, a subsidiary practice of DXC Technology, have announced a partnership in which DXC Red Rock will resell JAMS, an enterprise job scheduling and workload automation solution.

JAMS reduces the operational costs of Oracle and JDE by automating batch processes, managing dependencies between processes, and managing workflows that require tasks to execute across multiple platforms and applications.

“The MVP Systems Software and DXC Red Rock partnership provides DXC Red Rock customers with automation solutions that have an immediate impact on their digital transformation goals,” said Rob Musca, MVP business development manager for the Asia Pacific Region. “Customers can leverage powerful features for scheduling, triggering, and monitoring jobs in Oracle and JDE. This partnership leverages the best of both companies so that customers can establish efficient enterprise workflows well before putting new solutions into production.”

“Our partnership with MVP gives DXC Red Rock’s Oracle and JDE customers unique opportunities to fast track their investments in infrastructure and applications,” said Daniel Smith, solution director – Global JD Edwards Center of Excellence for DXC Red Rock. “JAMS complements the standard JD Edwards offering and lifts the capabilities to allow customers the flexibility of dependency linkage, process monitoring, escalations, and workflow visibility to name just a few features. The potential ROI is enormous for JD Edwards customers considering JAMS as a powerful addition to their application footprint.”

DXC Red Rock is the largest independent provider of Oracle consulting and managed services in Australia and New Zealand. DXC Red Rock has been globally recognized by Oracle as an Oracle Platinum Partner, Oracle Cloud Select Partner, and Oracle Managed Service Provider.
