VOLARA AND REACT MOBILE VOICE-ENABLE EMERGENCY RESPONSE IN HOTELS

HOSPITALITY GRADE INTEGRATION ENABLES A NEW LEVEL OF PROTECTION FOR HOTEL GUESTS AND STAFF.

React Mobile is the only enterprise grade emergency response system specifically tailored for hotel employees that can be engaged by voice.

React Mobile is fully integrated into, and can be deployed in conjunction with, Volara's market leading software for the Amazon Echo that provides seamless management of all voice interactions and a fully integrated voice interface for all your hotel technologies.

BENEFITS INCLUDE

- **Frictionless Engagement in Times of Distress.** Calling out vocally for help is the most natural response when sensing danger.

- **Extends protection to guests as well as staff.** Devices in each room mean that emergency services are available to everyone in the area.

- **Room level accuracy of every alert.** The most specific and accurate way to locate individuals in need of assistance.
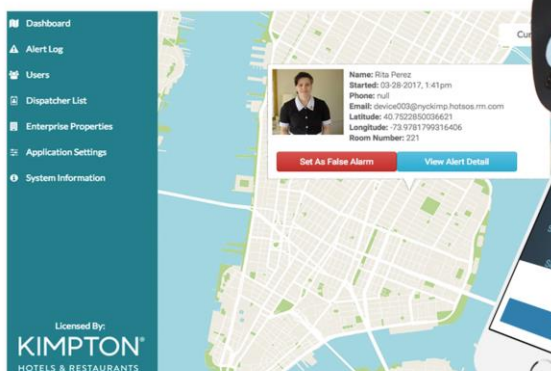

ASK YOUR REACT MOBILE REPRESENTATIVE ABOUT ADDING VOICE CONTROL WITH VOLARA

Volara + React Mobile
