RECOMMENDATIONS

Recommendations

[+ Add](#)

Recommendation for the role of Project Director on the **New Product X Development** project.

“ It was great to be working with Rick again. He was able to keep the product development project moving, handling all issues so we in the development team could get on with our work.

– Stefan Johansson, Engineering Manager

EXPERT SEARCH

The Expert Search interface displays a grid of employee profiles. Each profile includes a name, a job title, and a location. Below each profile is a 'Discover Me' button. The search results are filtered by 'Particulate Control Equipment'.

The detailed view for 'tra' shows a list of skills categorized by experience level:

- CAREER ROLES HELD**
 - Database Development and Administration
 - Teletraffic Engineering (ENGINEERING)
 - Patient Transportation Services (GENERAL HEALTHCARE EXPERIENCE)
 - Safety Training
 - Training and Career Development (HUMAN RESOURCES)
 - On-Demand Transportation (LOGISTICS)
 - Transportation
 - Mafic-Ultramafic (MINING & MINERALS)
 - SFP Transceivers (TELECOMMUNICATIONS)
 - CFP Transceivers
 - RF Transceivers
 - Transceivers
 - SFP+ Transceivers
 - XAUJ Transceivers
 - XFP Transceivers

REPORTING AND ANALYTICS

The Reporting and Analytics dashboard in Power BI displays two main visualizations:

- Skills Distribution:** A bar chart showing the distribution of skills across various categories. The x-axis lists skill categories, and the y-axis represents the count or frequency of each skill.
- Geographical Skill Centre:** A map showing the geographical distribution of skills. The map highlights various regions, with a tooltip providing details for a specific location, such as 'Mining Nuclear Sector Expertise Operations Skills'.

The dashboard includes a navigation pane on the left with options like 'Home', 'Recent', 'Apps', and 'My Workspace'. The main area contains a 'Report Pack A' with filters for 'Skill Definition Filter', 'Skill Filter', and 'Person Filter'. The 'Skill Filter' section includes a list of skills such as 'Mining', 'Telecommunications Skills', and 'Ultramafic Skills'.

Comprehensive Enterprise Wide Skills and Expertise Inventory

DiscoverMe provides each employee a profile that can be filled out with skills and expertise from a taxonomy that is specific to your organization. WAND Foundation Taxonomies are included so an organizational skills taxonomy can be easily defined. Skill groups can be created for different departmental or functional areas so that your IT or engineering employees, for example, are only tagging themselves with IT or engineering skills respectively. Employees can build a skills profile and rate proficiency for each skill. It's as easy as filling out a social media profile!

Expertise Search

Employee talent profile search quickly gives individuals visibility of colleagues' skills, expertise and experience across the organization. Find the experts in your organization for any subject.

Employee Collaboration

Find people with the expertise you need and start a virtual team. Skill centered communities enable employees to collaborate with others based upon knowledge and expertise. Collaboration groups can be generated directly from DiscoverMe search results. DiscoverMe allows people to quickly and easily get in touch with others who have the knowledge and expertise to quickly solve pressing problems.

Recognition and Engagement

Employee engagement has a strong correlation to organizational performance. With DiscoverMe, employees can endorse and recognize fellow employees directly on a profile page. This public recognition of the skill an employee has shows how the employee was able to use that particular expertise to help a teammate solve an important problem. These endorsements can be factored into future expert search results so that the best experts can easily be found.

Skills Analytics and Reporting

DiscoverMe leverages Microsoft PowerBI to run reporting and analytics on your skills inventory to identify skills gaps. Understanding your organization wide skills inventory can help you strategically manage hiring, training, upcoming skills gaps, and improve overall talent management. Reports on the skills profile of your organization can help you showcase the capabilities of your organization and help make more sales.
