## Introduction

Our Human Family must approach God as a single entity in order to resolve all of our conflicts between ourselves and Him. Humanity is a complex mechanism of human life. We encounter conflict between ourselves and our Supreme Being all of the time. We have to work together all over the world to try to identify our conflicts with God and to resolve those conflicts.

Each of us has a unique and individual relationship with God. However, we cannot continue to succeed in taunting and humiliating God before He will decide to punish us. The ultimate punishment for us is that God will cause us to die. That is a painful reality for ourselves, for our loved ones, and for our friends.

How does Humanity's Unification with God work? We have to come to the realization that we all have to achieve an attachment to God. God has to guide us through our decisions and through our daily tasks. God has to guide us through the way that we love others such as the way that we love a spouse or the way that we love our children. We must come to understand the power of prayer and the benefits of achieving a genuine and productive dialogue with God.

Ignoring the existence of God in our lives only causes us to disintegrate into a state when we will think that we can hurt others and to commit crimes without facing the discipline that we deserve for do so. A detachment from God can lead us to carry out attacks against our brothers and sisters all over the world. A detachment from God can cause us to injure God's relationships with our brothers and sisters when it will cause us to resort to violence, suicide, and/or murder accomplish our goals.

The time has come when we have to unite with our brothers and sisters so that we can present ourselves as a Human Family that will show remorse for the suffering that we have caused for God during the entire time that we have existed in His Universe. Our entire Human Family must go to God collectively to ask for forgiveness for what we have done to ruin God's existence in His Universe. Furthermore, we must work to achieve an International unification with God in which we will stand as one Human Family that will answer to the One True God.

God will then be able to talk sense into all of us. God will be able to stop us from committing crimes. God will be able to stop us from wanting to hurt each other. God will stop us from facing the suffering of wrongful deaths. God will help us to achieve a state of peace and tranquility when we realize that we must join all of our brothers and sisters in an effort to find God, to reach God, and to present ourselves to God so that we will be able to have a new beginning with God.

Our new beginning with God would be free of hatred toward our brothers and sisters. It would be free of the intent to injure or to murder members of God's Human Family. Those of us that are less fortunate than ourselves would not try to hurt themselves with illegal drugs, alcohol, and firearms. Our brothers and sisters will receive intensive psychiatric treatment when they feel like committing suicide and/or committing a homicide. The Unification of Humanity through Science is a process where we will all find God. God will become a very powerful force in our lives. Our Human Family will no longer suffer because of hatred that leads to violence and self-destructive behaviors.

# What Is the Meaning of Unification?

## Hatred Between Each Other Will End

God cannot tolerate the type of hatred that leads to violence and suicidal behaviors from His human beings here on this planet. God wants to stop the pain and suffering that hatred between our brothers and sisters will cause for Humanity when it drives our brothers and sisters to commit suicides and/or homicides.

Our Unification with God through Science is about stopping hatred between our brothers and sisters. Unification is about working with God to help our emotionally disturbed brothers and sisters to understand that we are obligated by our relationship with God to show love for each other and to reject all feelings of hatred for each other.

Unification means that God and the Holy Spirit will have major roles to play in resolving key issues between our brothers and sisters in the future. We will resolve our issues with each other by going to God and asking Him to lead us to the resolutions of our problems so that we do not have to resort to using violence to do so.

God will make it perfectly clear to us that religious hatred is completely unacceptable. Hating our brothers and sisters because they belong to a certain religion infuriates God and makes Him suffer. God will not tolerate any negative stereotyping of the members of any of His religions so that we will have excuses to hurt others that belong to religions.

We have to work with our psychiatrists to help those that are mentally ill to stop their campaign of hatred against our brothers and sisters all over the world. We need to work with our scientists to finally find the God that lives inside all of us and all around us.

## Understanding that God Creates All Life

We take the creation of life for granted. Sometimes we do not think about God at all when a woman becomes pregnant. We do not recognize that God creates a human life inside of a woman in His Factory of Human Life. We do not immediately recognize that a pregnancy is an Act of God.

We take the creation of food such as of plants and animals for granted. God likes to create fruits, vegetables, and meat products so that we will have food to eat. We do not think that God creates practically all foods that we try to buy in a supermarket or a convenience store. Does that mean that we unfairly exploit God?

Unification will be a process where scientists will help us to understand how God creates and develops all human and nonhuman life. God loves to create and to maintain human life. Everything that we eat and drink comes from God in one way or another. Our Unification Scientists will help us to understand that God wants to create an infinite number of human lives for the rest of eternity.

Unification is about helping all of us to understand the different ways that God will create human and nonhuman life. Unification Scientists will work with God to build food factories to produce enough food to stop starvation and poverty all over the world. We all must be compassionate with God and we must try to achieve parenthood so that God can work us and a partner to create and to develop new human lives. This will help God to continue to achieve His mission to create Human Lives.

## Promoting the Development of Human Life

Unification means that all of our brothers and sisters will understand their commitment to work with God to promote the conception, the childbirth, and the development of new human lives. Our brothers and sisters will come to understand that we have always been a Part of God. We share the same goal as God when we want to participate in the creation and the development of new human lives.

Our purpose is to develop one to about three human lives. God wants to develop tens of millions of human lives. Our Unification Scientists will help us to investigate God's many roles in the creation and in the development of human life. We must admire God for His need to work with us and with His scientists to develop and to promote life throughout the Universe.

God is very hurt when some of us decide that they do not want to achieve parenthood. God loves all of us despite the sexual orientation that we decide to adopt for ourselves. Our Unification Scientists will help our young adult students to understand the benefits of pursuing and achieving parenthood. Our scientists will help our students to understand the joy and beauty of achieving a childbirth with a partner of the opposite gender. Our Unification Scientists will help our young adult students to understand the joy of developing a young baby throughout the child's lifetime.

Unification Scientists will help our young adult students to find God. Part of finding God for our young adult students is to realize that God has the joy of parenthood waiting for them when they become adults. Unification scientists will ask our young adults to be nice to God and to seriously consider achieving parenthood with a partner of the opposite gender in order to honor God and to bring joy and happiness to God.

## The Prevention of Suicides and Murders

Unification Scientists will conduct investigations to try to understand why so many of our brothers and sisters resort to committing suicide and to committing homicide. These scientists will try to understand why we cannot get psychiatric help to either suicidal and/or homicidal people before they will lose their freedom for the rest of their lives.

Unification Scientists would work with schools, with educators, with law enforcement agencies, with the criminal justice system, and with our community of psychiatrists and therapists to help those of us that are so ill that they want to destroy themselves and/or to destroy other. We must remember that God does not create evil. Individuals that exist in a suicidal state and in a homicidal state are mentally ill. They are not evil.

Unification Scientists will work hard to find ways to save the lives of those of us that show the intent to hurt themselves and to hurt others. One of the goals of the Unification Movement will be to provide psychiatric treatment to all of our brothers and sisters that are of high risk for committing suicides and homicides.

We have to train our kids and young adults in all schools all over the world to see the warning signs all over the world that they must try to seek out psychiatric care if they feel like hurting themselves or like hurting others. Unification Scientists would help schools to understand how to make sure that their students could get help when they become this gravely ill.

## God Works with the Criminal Justice System

God's goal is to keep all of our brothers and sisters out of incarceration and out of juvenile detention. God does not want our societies to groom our young adults to face incarceration and a life of crime for the rest of their lives. God will not tolerate schools that graduate students that are destined to achieve substance abuse, violent crimes, and that will cause pain and suffering for the community.

Unification Scientists will work with the criminal justice system to develop special programs to educate our kids and young adults about the dangers and consequences of committing crimes. Our kids and young adults must understand how God feels about the way that we can hurt ourselves and the way that we can hurt others by committing crimes.

Unification Scientists and Criminal Justice Officials will work together to show our kids and young adults the final end result of committing crimes. They will show our kids movies of drug dealers, prostitutes, armed robbers, trials, and numerous arrests. Our kids and young adults will also see the kind of life that is waiting for them in prison if they decide to pursue a career in crime such as in drug dealing on the streets of their community. Kids need to see what Juvenile Detention Centers are like so that they will understand the consequences of committing crimes as juveniles.

Unification Scientists will teach our kids and young adults to show respect and love for God by avoiding the commissions of crimes, of self-destructive actions, and of actions with the intent to hurt others. Psychiatrists will be involved in every school in every city in order to help God to save every one of our children and young adults from a life of crime and incarceration.

## God Cares about How We Develop Life

We are all on a mission from God to work with Him to create and to develop human lives. We work with God to help our children to work toward achieving parenthood and functioning in a career. God cares about us if something goes wrong in the way that we have been raising our kids and young adults in our homes and in our schools.

Unification Scientists will help kids and young adults to understand that God is part of the way that their parents have been raising them. Unification Scientists will help our kids and young adults to the role that God will play to help them to function adequately in their home and in their school.

Unification Scientists will help our kids and young adults the way that God helps their teachers and parents to develop them into adults. These scientists will encourage these students to attempt to find God through prayer and through scientific investigation. They will help students to understand what happens when someone finds God through scientific investigation and training and through prayer and meditation.

Our parents and educators help our students to find God in their lives as part of the Unification of God and Humanity through Science. That means that God will adequately prepare us to achieve parenthood. That means that God will prepare us for a career. That means that God will prepare us for a new life when he offers us the opportunity to achieve parenthood with a partner of the opposite gender.

Unification Scientists will promote the development of human life by helping our kids to understand the benefits of achieving success as parents and loving God for the gift of human life.

## We Must Understand the Will of God

Unification Scientists will help all of us to understand that we have an obligation to come to understand the Will of God in our lives once we have succeeded in finding God and in achieving an Attachment to God. Part of the Unification Process is to work with scientists and religious leaders to try to understand what God expects from us and how we will meet God's expectations.

We are all one Human Family. God has individual objectives for all of us. God also has universal objectives for the entire Human Family. We discover God's expectations for us through our personal relationship with Him in prayer and in the way that God communicates with us. We can have conversations with God in order to better understand what he expects from us and how we should achieve His expectations.

Our Unification Scientists must work with religious leaders to help our world leaders to understand God's expectations for His Entire Human Family. The United Nations needs to understand the Will of God. The United Nations has to understand God's expectations for us. The United Nations has to work with Unification Scientists to understand how they will finally achieve those expectations as a single Human Family.

We have to try hard to do everything that we can to do to work with all of our brothers and sisters, our scientists, our educators, our parents, and our religious leaders to discover God's expectations for us and to help us to fulfill those expectations so that we can work together to understand and to achieve the Will of God.

## We Must Work to End the Existence of Evil

Our Unification Scientists will work with God, the Holy Spirit, Humanity, religious leaders, world leaders, and mental health professionals to investigate and to remove all evil from God's Human Family. Evil is an idea that we can proceed to accomplish something by seeking to persistently injure and/or to persistently destroy human life. This is a cancer within God's Universe that threatens His Existence every second of every day.

Unification Scientists will have to determine whether evil is a product of an epidemic of various mental illnesses. Evil could be a defect that God has created into His Universe by no fault of His own. Is evil a birth defect in some human beings? Is evil and illness which we can treat with psychiatric medications? Is evil an untreatable and/or unrepairable defect within God's Creation that has always been there and will always be there no matter what we can or cannot do about it?

Unification Scientists will help us to understand that God in no way creates evil and in no way supports and maintains the existence of evil. God has been trying hard with all of us to disable evil in His Universe. We are all part of God. God does not want to incarcerate us forever because He will think that we will always do evil things to ourselves, to others, and to Him.

Unification Scientists will work with Humanity to finally bring a peaceful end to the existence of evil in God's Human Family. God deserves that from us. We can try to develop programs and incentives that will help us to save people that want to commit themselves to doing evil things. We have to show these people how much God and all of us love them so that we can stop the cancer and the epidemic of evil from destroying the lives of our brothers and sisters at that point.

## We Must Understand Right Versus Wrong

Unification Scientists must work with all educators in all public, private, and religious schools to help our kids and young adults to work with God to understand the difference between right and wrong. Scientists must not be afraid to train our students to follow the advice and guidance of God as a warning that they may be engaged in a life-threatening behavior. Our Unification Scientists must help our students to understand that God and the Holy Spirit are always there for them to guide them to make responsible and intelligent decisions when they are under stress, are confused, and are in need of guidance.

We must help students that have broken the rules to understand what they have done wrong through constructive discipline. We cannot hurt our students in the process of disciplining them. We have to teach them the difference between right and wrong in a peaceful way that is beneficial to their mental health.

Unification Scientists, educators, parents, and criminal justice officials must teach young students about the dead end of illegal street drugs, alcohol, and smoking. Our kids will discover the truth about what happens when someone uses a firearm during a robbery. They will know what will happen when young adults and adults kill someone while driving drunk under the influence of alcohol.

Part of the Unification Process between Humanity and God will be to develop our kids and young adults to avoid the reckless and irresponsible behaviors that would lead them to face incarcerations. We must teach our kids, young adults, and adults to be intelligent so that they will continue to honor their communities and to honor God.

## We Must Groom Our Kids for Success

Unification Scientists will teach all kids and young adults about the power of prayer. They will teach our kids and young adults about the rewards that will await them if they establish a strong and productive relationship with God. Our educators in all schools will come to understand that all of our students will have the best chance of achieving success as adults if they establish their relationship with God at the youngest possible age.

Unification Scientists will help all of our educators to understand the consequences of teaching young students to completely ignore the existence of God in their lives. That causes an injury to the development of our students that could lead them to hurt themselves with illegal drugs, alcohol, tobacco, the commissions of crimes, and the attitude that going to school and learning are not worth the effort.

Our Unification Scientists will make it perfectly clear to our educators and parents of our kids and young adults that the best way to groom our students for success in our schools is to help them to establish a relationship with God at the earliest possible age. This type of religious development gives a child and/or a young adult an advantage because he or she will feel the love of God. The guidance of God will help the student to understand his or her destiny. The love of God will help the student to show love and kindness for others. The intellect of God will help students to achieve higher levels of learning and higher grades. Higher levels of learning can help them to become more successful in their colleges, their careers, and in their attempts to achieve parenthood and a successful family life.

## Conversations with God Are Fine

Unification Scientists will help all of us to understand that all of us have the capability to have conversations with God. We all can interact with God. God can listen to our concerns, problems, issues, and the situations that worry us the most. God and the Holy Spirit want to work with us to help us to live better lives that exist without pain and suffering. They want to make it easier for us to love the people that care about us the most such as our teachers, our parents, our family members, and others.

We can ask God for advice when we talk to Him. We can ask Him for forgiveness and for sympathy if we have succeeded in doing something to hurt ourselves and/or to hurt others. We can apologize for what we have done wrong. We can understand how to work with God to fix a problem that we have caused that hurt God and others in our lives.

Unification Scientists will encourage all of us to go to God with our problems and concerns. God is there to love us and to help us. God is there to guide us down the road to success. God wants us to stay out of incarceration. God does not want any of us to face arrests for any type of crime. God does not want any of us to live in a situation that hurts us all of the time.

Our students can understand the meaning of love from his or her relationship with God that starts in childhood. God helps a newborn's parents to teach the baby how to talk and how to begin to function. Parents sometimes need to go to God for advice about how to deal with problems that they are having in raising their baby or child.

God helps us to be productive parents. God helps us to be productive sons and daughters. God helps us to sustain a strong learning environment in schools and a strong family environment in a student's home.

## We Must Reject Illegal Drugs and Alcohol

Unification Scientists will explain it very clearly to our students and adults. We all must reject illegal drugs and alcohol. Our students must understand the way that they can destroy themselves with illegal drugs and alcohol. They have to understand that using these substances has no positive purpose at all for a person's health. It is illegal for minors to use alcohol. It is illegal for everyone to use illegal drugs. Unification Scientists must work with educators, world leaders, and mental health professionals to work with our kids, young adults, and adults to stop this epidemic of substance abuse that is killing humanity right now.

We must make it perfectly clear to our kids and young adults that illegal drugs and alcohol are dangerous substances that do nothing but to make people sick. Our students should understand the hopelessness that happens when drug dealers and substance abusers get arrested and go to prison. They have to become aware of what happens when they have to go to substance abuse rehabilitation so that they can let go of their addiction.

Part of the unification process between Humanity and God will be about Unification Scientists that will work with our kids, young adults, and adults to stop the international epidemic of substance abuse all over the world. Humanity will work with God to put an end to this disaster once and for all. We will come to save the lives of all of our kids and young adults by convincing them to reject illegal drugs and alcohol. They will fulfill the will of God in their lives with the reject these substances.

## We Must Stop Fantasizing about Violence

We hurt God when He detects that we have been having hateful thoughts about hurting our brothers and sisters. Some of us believe that engaging in violence is the only way to solve a problem that we have with someone else or to settle a dispute that we have with someone else. It might get to a point with us that we would not care about how we are hurting God by the way that we are planning to injure or to kill another human being. This type of thinking represents a total detachment from God.

A total detachment from God gives a person the impression that he or she will not face any consequences for trying to injure or to kill another human being. The person feels that there will be no penalties that will be involved when he or she carries out a plan to seriously hurt someone. The person that is detached from God will have no sympathy whatsoever for the suffering that he or she will be causing for God.

Finally, the person will face an arrest and an incarceration. That is what really hurts God. God cries when He loses one of His sons or daughters to incarceration. God does not create us to be locked up in a prison for the rest of our lives. He cries when He has to sustain the existence of human beings in prisons and in correctional facilities. The criminal justice system has no sympathy or idea about how much God suffers when He has to keep prisoners alive in incarceration.

Unification Scientists will train our students to get psychiatric help and to work with God if they ever have hateful thoughts about hurting themselves or of hurting others. Unification Scientists will help all of our students to understand that God in no way wants to support their existence in a prison or a correctional facility. We will teach our students to live a life that will be free of committing crimes and that will be free of committing acts of violence.

## God Works with Humanity to Help Us

Part of the Unification Process will be for Humanity and God to work together to work as a team. Our brothers and sisters will work with God in various professions to help us in our time of need. God has armies of special people that can work to help us when we become ill or when we face life-threatening conflict in our lives.

Unification Scientists will help Humanity to establish a partnership with God that will be dedicated to helping those of us that are less fortunate than ourselves. The Partnership of God and Humanity will work to end all human suffering, to achieve a Universal Attachment with God for all of us, to cooperate with God when He will try to intervene as He struggles to help us through our problems, and to guide us through the most difficult times of our lives.

Unification Scientists will help us to reach out to God. We will then feel that we can grab on to God. We will feel that we have finally found God. We will feel that God is an ever-present force in our lives. We will feel the power of our Supreme Being when our scientists lead us to God. We can do everything that we can to work with God to make Humanity a better existence for God and for all of us.

Unification scientists will recruit all members of all different religious communities to work with them to establish the partnership between God and Humanity through the process of unification that will seek to help us to live better live. This partnership will help us to help others to live better lives. We will have to work hard to make sure that our alliance with God becomes successful.

## The Universal Power of Prayer

Unification Scientists would ask all human beings to attempt to communicate with God. A universal on the part of our Human Family to reach out to God and communicate with Him would be a step in the right direction for all of us. God needs to understand how we feel about our issues and concerns. God needs to help us to understand how He feels about the way that we are conducting our lives and how people are treating us.

Unification Scientists would sponsor prayer workshops all over the world. All of our brothers and sisters that would practice in all different religions would be invited to attend the seminars. Our moderators would talk about how the power of prayer can help us to resolve our problems, to strengthen our relationship with God, and to bring happiness and joy to our colleagues, friends, and family members.

Prayer often time is our effort to go to God with a request. It might be that we need help. It might be that we are asking God to help someone else that is sick or in need of help. We may need help to accomplish a goal. We might need God's help to help to save our relationship with a spouse or a fiancé that is struggling for reasons that we do not understand. Sometimes we will pray to ask God to help our children who are in need of help such as psychiatric treatment and psychotherapy.

Unification scientists will help us to understand the first thing that we have to do once we succeed in achieving Universal Unification with God through Science is to open a line of communication between ourselves and God through prayer. We must go to God to ask Him about His will for us. We will need His advice. We will also need God's guidance in order to help others.

Humanity's Unification with God will lead to an eternity of peaceful coexistence between all of our brothers and sister and God.

## Paranoia Does Not Justify Harming Others

We cannot believe that people that are suicidal and homicidal at the same time actually exist all of the time. There are not that many people that would agree to commit suicide and homicide at the same time. Investigating them and trying to prosecute them after they have become deceased after they have succeeded in killing themselves and in killing others at the same time makes no sense. We cannot prosecute the spirits of deceased people.

International Scientists and international psychiatrists have to help all of us to understand that paranoia is a symptom of a psychiatric disorder. It means that we believe that people are trying to hurt us or to kill us when in reality those people either do not exist or are already deceased. We cannot justify hurting someone or trying to kill someone only because we believe that they may have the intent to stage an episode in the future where they might try to kill themselves and to kill others simultaneously. International Scientists have to help anyone who is ready to hurt themselves and that wants to hurt others as mentally ill and that is in need of immediate and comprehensive psychiatric treatment. Seeking to destroy people that are determined to destroy themselves makes no sense at all. We must do everything that we can to investigate this cancer and to put an end to it. There is no excuse for the existence of individuals that are so sick that they want to kill themselves and that want to kill others at the same time. God wants to put an end to this suffering through peaceful confrontation between these mentally ill people and our mental health professionals.

## Forgiving Members of Other Religions

There are times when that members of one religion try to hurt members of another religion. There are times when we will feel justified in going to war in going to war against our brothers and sisters of other religions. We forget that all of us answer to the same One True God no matter what religion that we belong to. God does not tolerate a war between members of two different religions. God will not tolerate hatred between the members of two different religions. God will not tolerate the need to hurt a member of another member of a religion other than of our own.

Unification Scientists have to help us to forgive all of our brothers and sisters all over the world for hurting us and for having the intent to hurt us. We must stop expressing hateful thoughts about our intentions to hurt others that so mentally ill that they portray themselves as capable of destroying God's Human Family. They are our brothers and sisters that are in desperate need of psychiatric care and of guidance so that they can achieve an Attachment to God.

We deeply hurt our brothers and sisters of different religions by making hateful statements about them that express our beliefs that they are evil and that we should try to use military force to kill them. God does not allow us to kill anyone under any circumstances. What offends God more than anything else is that we would rather escalate the violence in the world instead of trying to reach a peaceful resolution to these conflicts that do not involve violence or hateful thoughts about the intent to hurt each other.

Unification Scientists will help us to understand that the hatred, the violence, the excuses to want to express hateful and rude comments about our brothers and sisters, our inability to forgive our brothers and sister, and our refusal to have sympathy for them or to have any willingness to help them are terrors that God will not tolerate. We must be forgiving of our mentally ill brothers and sister that express the intent to inflict harm upon themselves and upon others and we need to help them from dying by making sure that we can work with the United Nations to help them to get the psychiatric treatment and the psychological counseling that they need and that they deserve.

There have to be reasons why we want to hurt each other. Obviously, God understands why we have hateful thoughts about hurting each other and about killing each other. God has lost his patience with the excuses that people have to justify the hatred and wrongful deaths that are paralyzing His Human Family. God wants this kind of warfare to end once and for all. God does not deserve this kind of suffering after what He has done to rebuild Humanity after thousands of years of wars, conflicts, and endless cycles of warfare and death.

It is immature to think that we can find the authorization to prosecute anyone in another country by tossing bombs and missiles at them because we believe that they have the intent to injure human beings in different parts of the world.

Unification Scientists will help us to understand that God can no longer tolerate the excuses that He is hearing that are supposed to justify this war whatever this war is. God wants this warfare to be resolved by peaceful confrontation The time has come to end the illness that has been causing us to need to hurt ourselves and to hurt our brothers and sisters which belong to different religions. We must work with God to ask Him to guide us and to forgive us for the way that we have been making excuses to hate each other and destroy our own lives and the lives of others. We hope that God can help us.

## How Do We End Hatred and Violence?

Unification Scientists must try to understand the types of mental illness that generate the energy to convince us to have harmful thoughts about hurting others. The one thing that we all have to remember is that God does not create evil. God creates human beings in His Image and Likeness. We must investigate why people want to hurt each other. Obviously, all of the parties that have been involved have grievances against each other.

We have come to believe that we should solve our grievances and disputes with other nations by using military force to kill people and to destroy properties and targets from within the country that would be the target of our warfare. God does not authorize murder and warfare. Murder and warfare do not accomplish anything for God. Military exercises that involve death and destruction are illegal as far as God is concerned. We have no right to travel to a foreign country, to kill people there, to come home, and to go on with our lives after we have saved Humanity from some demonic threat.

We have to end hatred and violence through peaceful confrontation. We have to understand the dynamics of our conflicts with others. We have to understand that we cannot continue to escalate God's suffering. We have to try as hard as we can to negotiate with those of us that are angry with us. We cannot make excuses to justify our refusal to negotiate an end to our hostilities with any other nation or entity that consists of human beings. We have to remember that we all answer to God. We can no longer use death and destruction to settle our conflicts with other nations and organizations. We have to be humble about this. Everyone has to stop hating each other.

## What Happens When God Forgives Us?

Our prophets have taught us that God is a forgiving Supreme Being. He does not like to hold grudges against us. God does not want to remain angry at us. He wants to forgive us when we do something wrong. God wants guide us away from the crimes that would lead to our arrests and incarcerations.

What can we do to offend God? Sometimes we can engage in reckless sexual behaviors. God can be so angry at us about our sexual behaviors that we can become infected with a sexually transmitted disease. They can arrest any of us for becoming violent. God does not tolerate that kind of destructive behavior.

God can try to forgive us when we are sorry. Then the Holy Spirit can work with us to try to rebuild our lives. God and the Holy Spirit can help us to recover from what we have done wrong. It is hard to get back on our feet and to function after we have damaged our relationship with God.

Humanity also has to forgive us when God tries to forgive us. God tries hard to help Humanity to understand that we deserve sympathy and forgiveness. We have to rejoin the God's Human Community as a forgiven human person.

Unification Scientists must teach all of us to forgive each other. They must teach us how to show remorse to God and to the Holy Spirit. They must help us to rebuild our lives after we have been driven to hurt others through hatred and the need to injure others that we have felt to be a threat to us. They must help us to understand that God wants to forgive all of us. God does not want to expel us from His creation. God wants us to achieve forgiveness so that we will be able to retain our freedom.

## We Must Help and Forgive the Mentally Ill

More times than not our conflicts with others can be driven by another person's mental illness. Sometimes our need to hurt another person happens because of an untreated mental illness. We also can seek to hurt ourselves when we have to deal with an untreated mental illness.

Unification Scientists must work to establish an international network of psychiatrists that will be able to reach and to help all of our mentally ill brothers and sisters all over the world. It is better to save the lives of our mentally ill brothers and sisters through psychiatric intervention rather than to lose them to incarceration because they could not get the psychiatric treatment that they needed before it was too late.

Mental illness is the leading cause of criminal behaviors and of substance abuse in the world. Mentally ill persons are more likely to try to help us by trying to commit homicide or by trying to commit suicide. Mentally ill individuals are more likely to face long-term unemployment and to face homelessness.

We must try to identify all persons that have mental illnesses within our family of brothers and sister. We must try to get them the psychiatric treatment and psychological counseling that they will need in order to help them to live normal lives as part of God's Human Family. We must work to stop our mentally ill brothers and sisters from resorting to suicide and/or homicide to accomplish their goals in their lives.

We must do everything that we can to help our mentally ill brothers and sisters to work with scientists, mental health professionals, God, and everyone else to save their lives before the resort to suicide and homicide to make a statement about their beliefs that some of us deserve to face punishment.

## God Will Work with Us to Stop Terror

There are not many people out there that want to commit suicide and homicide at the same time. We must try to help these types of people that God and Humanity love them and that their needs to hurt themselves and to hurt others are unjustified. Unification scientists must help these severely disturbed people that God and Humanity want to help them. They must understand that no one wants any of them to die. We must help them to understand that we can still find the goodness in them. They are still Part of God even if they have an intent to injure others and to injure themselves at the same time.

Our Unification Scientists must work with Humanity to understand why human beings resort to committing suicide and homicide at the same time in order to accomplish their goals. We must reach out to them as brothers and sisters that will work with God to forgive all of them for what they have tried to do to us. Our Unification Scientists will try to bring the existence of God back into the lives of our mentally ill brothers and sisters so that they will understand that hurting themselves, hurting Humanity, and hurting God at the same time is horrible and are evils that are beyond the standards of God and of Humanity. We must be willing to help those of us that want to kill themselves and to kill others. We must ask them to remorseful to God for the way that they have hurt God and Humanity with the intent to hurt themselves and to hurt others. We must rehabilitate them and then we must welcome them back into the Human Community. These are productive goals.

## We Are All Part of God

We are all created in the Image and Likeness of God. We share our common emotions and ideals. We all answer to our One True God. We are committed to working with our One True God to find our identity as part of His Universe. We have to understand that we are part of a whole that rotates around God even though we have our own individual identities.

It is difficult to become detached from God when God love us so much. It is difficult to hurt ourselves and/or to hurt others when we feel the Love of God in our lives. It is hard for us to evolve from childhood and young adulthood with the intent to hurt God, to hurt ourselves, and to hurt others. We must recognize that we exist as part of a higher power. God creates us to exist as part of Himself.

Our Human Family can only achieve Unification with God when we recognize that we are part of God. We must recognize that God is forever part of our lives. We must recognize that we should take the will of God into account whenever we make decisions that affect ourselves and our loved ones.

We must be aware that God has the same emotions that we have. We must understand that we can make God happy by accepting the responsibilities of parenthood. We can hurt God by seeking to hurt ourselves and/or to hurt others. God feels a profound sadness when he sees our suffering. God suffers a profound sadness when He sees us facing a wrongful death or an unplanned death. God can cry when He sees the suffering that we face when we face the consequences of hurting ourselves and of hurting others.

Part of the process of the Unification of Humanity will be for all of us to recognize that we are all part of God. We will recognize that we share the same emotions and the same goals as God. We will realize that we will respond to the love of God and to the love of others in a constructive manner so that our love for each other will be constructive.

## Honoring the Legacies of God's Prophets

Unification Scientists should seek to honor God's Prophets during the process of the Unification of God and of Humanity. We have to come to understand the purposes of their missions. We have to understand the roles that they played in their efforts to save Humanity. We have to understand the love that they showed for all of us as the members of Humanity.

We want to honor the legacies of God's Prophets by establishing a lasting and final peace between all of our brothers and sisters. We also want to establish a final and lasting peace between ourselves and God. We have to recognize that we must love each other as much as the great prophets loved us. We must come to understand how to make peace with one another by understanding the teachings of the prophets and the relationships that the prophets had with Our One True God.

Unification Scientists will try to resolve centuries of conflicts between members of different religions in order to achieve a lasting brotherhood and sisterhood within Humanity. Unification Scientists will sponsor unification conference where religious leaders from around the world will work together to confront each other about their conflicts and to make peace with each other and to make peace with God.

We can honor the Legacies of God's Prophets by showing love, compassion, and forgiveness for all of our brothers and sisters from all different religion from all over the world.

## We Must Show Remorse to God

We all make mistakes. We all do things to hurt ourselves and/or to hurt others at one point or another in our lives. God suffers whenever we make someone else suffer. God suffers whenever He detects that we have committed a sin or that we have broken a law. God suffers when we have shown the intent to hurt others. God suffers whenever we show the intent to hurt ourselves.

Unification Scientists have to work with all of us to find way to say that we are sorry to God when we have hurt Him and when we have caused Him to suffer. We must recognize that we have done something wrong that represents a sin or a crime. We must admit that we acted in a way to hurt others and/or to hurt ourselves. We must show remorse for what we have done to hurt God and to hurt Humanity. We must promise that we will never attempt to commit the same sin or crime if God will give us a second chance to live as free persons as part of His Human Family.

Unification Scientists will help us to understand that we must go to God for forgiveness and the strength to rebuild our lives after we have hurt ourselves, have hurt others, and have hurt God by committing a sin or a crime. We need to learn that we cannot ignore the existence of God in our lives after we commit a sin or a crime. We cannot ignore God whenever when He attempts to warn us that we should not commit a sin or a crime. God will warn us about the consequences that we will face if we pursue committing a sin or a crime. We will face arrests, incarcerations, and unemployment if we ignore God's efforts to help us to refuse to commit a crime or a sin before we actually commit a crime or a sin.

We have to allow God to guide us away from the thinking that we may have that would promote the commission of sins, crimes, harmful actions against ourselves, and harmful actions against others.

## Looking to God for Guidance

Unification Scientists would teach all of us to be ready and willing to accept and to understand guidance that would come to us from God. Our Unification Scientists will help us to understand that God needs to guide us in many different types of situations. God wants to guide us away from situations in which we will face harm to ourselves or where we will harm others.

God guides us when He wants us to accomplish goals that are part of His will for us. God expects all of us to try to understand what He expects us to do to help ourselves and/or to help others. God expects us to show kindness and compassion as He guides us to help others to stop feeling pain and suffering with the help that we and God will be willing to offer to them.

God and the Holy Spirit would be ready to guide us if we face a life-threatening challenge problem in any of our lives. God and the Holy Spirit help us to avoid engaging in criminal behaviors. God and the Holy Spirit work with us to understand how to work to develop new human lives that God has brought into the world. God and the Holy Spirit are there to help us to understand what has been making Him suffer and what we can do to stop making Him suffer.

Understanding God's guidance is a learning process. We learn how to understand the difference between right and wrong. We come to understand the consequences of making God to feel suffering. We learn how to help our brothers and sisters in their time of need. We learn to work with God and with the Holy Spirit to find solutions to our problems. God's guidance teaches us that we have nothing to gain by hurting others. God teaches us the benefits of learning how to love Him and each other.

## God Will Work with Our Governments

Unification Scientists will work with the United Nations and with all of our governments. Their goal will be to teach world leaders about the benefits of participating in Humanity's Unification with God. Our world leaders have to understand that God exists in every country in the world. God provides the citizens of every country in the world with their drinking water, gasoline, natural gas, sewage and sanitation, wood, paper products, and all food that comes from farms and plantations. We have to recognize that all nonhuman life comes from God. We have to recognize that God give us everything that we need to support our existence on this planet.

Our world's governments and our world's leaders must understand the roles that God will play in creating human and nonhuman life within His Human Creation. Our world leaders must understand that God and the Holy Spirit expect us to recognize the way that everything that we need to exist as human beings comes from God and from the Holy Spirit. Our fruits and vegetables just appear out of nowhere. No one knows how nonhuman life comes into existence except for God since He is the Supreme Being that creates nonhuman life.

Unification Scientists will have to cooperate with world leaders and world governments to support Humanity's efforts to achieve Unification with God through Science. All of our pain, suffering, wrongful deaths, diseases, and conflicts will eventually end when Humanity achieves and Attachment to God. We will all work together to end our problems by exercising our relationship with God on a daily basis. Our Unification with God will guide all of us to a peaceful coexistence between each other, and with God and the Holy Spirit. That is when our pain and suffering will begin to end.

The ultimate goal of unification will be to achieve a lasting peace between ourselves and between ourselves and God. That is a beautiful dream to achieve if we could make it into a reality.

## Working with God to Stop Human Suffering

We all deserve to receive the help of God to end human pain and suffering. Our Unification with God will be about working with God to stop all human suffering all over the world. Unification Scientists can work together to help us to cooperate with God to begin to end pain and suffering all over the world.

God does not want us to continue to suffer as part of our existence as human beings. God wants to stop us from making Him suffer. God wants to stop making members of Humanity suffer also. God no longer wants to continue to punish us for bad behaviors. God just wants our bad behaviors to stop. God want our Human Family to stop giving Him excuses to want to discipline us through various types of pain and suffering.

A catalyst for the Unification with God movement will be that all of us all over the world will be looking to work with God and with the Holy Spirit to end pain and suffering for all of us and for all of our children in the future. We will finally negotiate with God as a single Human Family that will have sorrow and pain over what we have done to hurt ourselves, to hurt each other, and to hurt God for thousands of years.

The Unification of Humanity with God will be the end of the way that God and Humanity will be making each other suffer. It will be the beginning of an eternal partnership that will end our suffering.

## Conclusion

### Our Suffering Will End Through Unification

There are many reasons why our brothers and sister suffer within God's Human Family. Sometimes we want to hurt each other for unjustifiable reasons. Sometimes we want to hurt ourselves by being addicted to alcohol or to illegal drugs. Sometimes we are young adults that do not know any better than to hurt ourselves and/or to hurt others.

Our Unification Scientists will help us to establish a partnership with God that will help us to understand the nature of our suffering and the nature of His suffering. We will come to understand that Humanity cannot continue to exist in a state of mutual suffering between itself and God. God can no longer tolerate the way that we hurt Him. God can no longer tolerate the way that we hurt each other. God can no longer tolerate the way that He has to hurt us when we offend Him.

Our Unification with God through Science will help us to understand why we seek to hurt God. We will come to understand why God feels that He has no choice but to hurt us. Unification Scientists will help all of us to understand that we cannot live as a threat to God's existence or the existence of all of our brothers and sisters.

Unification Scientists must work with the members of the human community to try to understand why we generate so much conflict between each other and between ourselves and God. We have to try hard to understand that God has human emotions. He experiences the same emotions that we will feel in certain situations. God loves us. Our Unification Scientists will try to understand everything that we are doing wrong and how to solve the problems between ourselves and God. That would lead to a higher level of understanding that could help us to declare a truce with God that would end our mutual suffering with God.

### The Highest Standard of Living for All of Us

Unification Scientists will help us to understand how to benefits that we could enjoy from resolving the conflicts that we share between ourselves and with God. There are many benefits that we could enjoy from showing love and kindness between all of our brothers and sisters and with God.

One of the benefits that we will enjoy would be an elevation in the standard of living for all of our brothers and sisters throughout all of the Nation of Humanity. Poverty, starvation, and low income will end for all of us. We will all live in humane housing no matter where we live.

We will enjoy an extremely elevated life expectancy. We will live longer than ever before all over the world. We will be able to defeat the largest percentage of terminal illnesses that we have ever treated to be fatal in the history of medicine.

Our schools will produce the highest functioning and most highly educated graduates in the history of education. All students that need psychiatric treatment, psychological counseling, and family planning counseling and training will receive that help free of charge.

Our students will stop graduating from our schools to commit crimes and to face incarceration. Our teachers will guide our students to understand the consequences of committing crimes.

## Our Brothers and Sisters of All Religions

There is no difference between a human being that belongs to one religion and a human being that belongs to another religion. We all answer to the same One True God. We are all created in the Image and Likeness of God. We are all brothers and sisters that belong to one Human Family.

Thoughts of hatred and of the intent to injure or hurt our brothers and sisters of a different religion cause God to feel a deep pain and suffering. God does not want to experience conflict and violence between members of different religions. God does not want members of different religions to make excuses to hurt each other.

Unification Scientists can help us to understand that what religion we belong to does not matter. What matters is that we all answer to our One True God. The fact that there are different religions does not mean that there are different Gods out there. The fact that there are different religions does not mean that that we, as human beings, are any different than one another.

Unification Scientists will help us to understand that we must approach God as a United Family of Human Beings that will leave religious conflicts in the past. The brothers and sisters of our Human Family will work together to achieve a Universal Attachment to God. We will work with all of our brothers and sisters to bond with God. We will then achieve the purpose of the existence of our religions when we achieve this Attachment to God. We will finally achieve the dreams of our prophets by bonding with one another and by finding God for each other at the same time.

## No More Hatred and Violence Among Us

Unification Scientists will help all of our students that hatred and violence are incompatible with our relationships with God. We cannot continue to generate excuses to want pain and suffering to hurt our brothers and sister all over the world. We cannot pray for our brothers and sisters to face serious bodily injury or even death. We cannot pray for horrible things to happen to our brothers and sisters. There is no room for our hatred against our brothers and sisters in our relationships with God.

Schools all over the world have to understand that we cannot preprogram our students to engage in hateful thoughts and with the intent to use hatred as an excuse to use violence against our brothers and sisters. Our Unification Scientists have to work with all of our schools all over the world to help our students to reject hateful thoughts and justifications to hurt and to murder others. We must stop hatred and violence where it starts. We must stop hatred and violence in our grammar schools and high schools all over the world.

The Spirit of God exists in all of our schools all over the world. Our psychiatrists and Unification Scientists must work together to teach our students that Our Supreme Being does not deserve any more suffering than He has already had to suffer. Our students have to understand that it is not in their interests to elevate the suffering of Humanity by elevating the amount of hatred and violence that already exists here for all of us.

We must teach our students to love God enough to stop themselves from expressing hatred toward their brothers and sisters. Our students must understand that they must never use violence against their brothers and sisters. They must understand that Humanity does not need any more violence and suffering than it has already endured.

## Our Kids and the Criminal Justice System

Our Unification Scientists will understand that God and the Holy Spirit do not want our kids to graduate from a grammar school or a high school in order to face incarceration after committing a crime. Our schools teach our kids the basics. They have to teach our kids how to function on a higher level. We have to teach our kids and young adults about the difference between what is legal and what is not legal. Furthermore, we must help them to understand the consequences of breaking laws and of getting arrested as both juveniles and as adults.

Kids and young adults should see real recovered substance abusers that would stand in front of them in their classrooms to talk about what it is like to be a substance abuser and a drug dealer. Our kids and young adults need to hear what they will be facing as substance abusers and drug dealers from DEA Agents and from Narcotics Officers from their local police department or their local sheriff's department.

Our kids should come to understand how difficult it is to function when they have to enter a substance abuse rehabilitation center. They have to see just how substance abuse destroys a human being's life.

They also have to see how other types of crimes can cause them to collapse. These crimes are related to money laundering, armed robberies, prostitution, and working off of the books. Our kids and young adults have to receive the training about how to avoid committing crimes. They have to know that they need to follow the guidance of God and of the Holy Spirit in order to avoid committing crimes. They keep our kids free of arrests, incarcerations, criminal charges, and the commissions of crimes.

## Achieving a Peaceful Coexistence with God

Unification Scientists will help us to understand what we have to do to achieve a final peace between ourselves and God. That means that we will stop hurting God with our sexual behaviors, by committing crimes, and by hurting ourselves and by hurting others.

God will stop torturing us and punishing us when we will realize that we answer to God and that we have to play by His rules. We cannot exist in His Universe and have the ability to believe that we can injure ourselves, that we can injure each other, and that we can injure God without facing discipline from God. Unification Scientists have to help us to understand what we have been doing wrong and what we can do to stop doing things wrong.

We must all recognize the existence of God no matter what our religious background is. We must come to understand the role that God plays in our lives sooner or later. We must build a productive relationship with God from the time that we are children. God's goal for us back then was to help us to eventually live in a peaceful coexistence with Him.

God does not allow us to exist in a state of conflict with Him. Unification Scientists will develop many different methods that we can utilize to negotiate with God so that our conflicts with God will end. Then, we will be able to exist in a peaceful coexistence between ourselves and with God forever. God will help us to achieve a life that would be peaceful and productive for all of the human beings that are part of His Creation.

## No Intent to Hurt Ourselves or Others

Unification Scientists will help us to understand that we no longer have the need, the desire, and/or anything to gain by hurting ourselves and/or by hurting others. We will come to understand that the intent to harm oneself and/or to harm others is incompatible with God's ability to maintain the existence of all human life throughout the Universe.

Unification Scientists and Mental Health Professionals will work together to help all of us to understand that we, as a family of human beings that answer to God, cannot conspire to hurt ourselves and/or to hurt others. We must stop having the intent to hurt ourselves and to hurt others if our efforts to achieve a constructive unification with God will be successful.

We have to learn to love all of our brothers and sisters throughout Humanity. We only want good things to happen to them. We only want to help them to achieve their goals and to live in a lasting peace with all of us and with God.

We will no longer seek to hurt our brothers and sisters after we have achieved our Unification with God through Science. We will no longer seek to find the justification to hurt our brother and sisters. We will no longer have anything to gain by hurting our brothers and sisters. Our Human Family's members will live in peace with one another.

We will no longer have the need to inflict injuries upon ourselves. We will stop wanting to hurt ourselves. We will no longer want to hurt ourselves for any reasons. We will allow God to guide us away from self-destructive behaviors that we can use to injure ourselves.

## Open Lines of Communications with God

Unification Scientists will help all of us to understand that we are all free to communicate with God. We will all be free to express our feelings, issues, grievances, and concerns to God. God will help to guide us to achieve success in finally solving our problems. God will help us in trying to resolve problems that exist in our relationships. God will help us to understand the difference between harmful behaviors and benign behaviors.

God and the Holy Spirit want to help us to become better parents and to be a better husband or wife within our family. God wants to help parents to teach their kids how to pray and how to establish their personal relationship with God. God wants parents to teach their kids about how to respond to the will of God by obeying authority figures in the child's life such as a parent or teacher.

God wants to guide His children and His young adults in their coursework. God wants to help our kids and young adults to achieve excellent academic success in their schools. God wants His kids and young adults to develop excellent social skills as they mature through grammar school and high school. God wants to develop our kids and young adults to become successful members of His International Community of Human Beings.

God wants to find our kids and young adults. Kids and young adults can find God through prayer and through the pursuit of knowledge from studying a religion. God has an open line of communication with each of our students no matter what religion they study or how much they tend to pray or to worship Him. God likes to develop our kids and our young adults. God is always there for all of them. God wants the Unification of God and of Humanity to save every child and young adult in the world.

## Wrongful Deaths Will End

Our Unification Scientists will help all of our brothers and sisters all over the world to understand that murder and suicide are wrong for everyone that lives in God's Creation. Our educators will help our students to understand the consequences of committing a suicide or a homicide.

God does not tolerate a suicide. God can take the soul of a person that has successfully ended his or her own life and He could send that soul to be tortured in Hell or the Satanic Dungeon. There are very evil souls that live there because of the pain and suffering that they have caused for Humanity and for God.

The souls of murderers who die are also candidates to be incarcerated in the Satanic Dungeon. That is the price that they will pay for attempting to destroy human life in a way that disrupts and that injures Humanity.

We have to warn our students about the very serious consequences that they will face if they succeed in achieving a suicide or a homicide. They must know that they will probably be facing torture and incarceration for decades before God will give them a chance to start living a new life through reincarnation in the future.

We have to help all of us that we will be facing torture, death, and a lifetime of imprisonment if we devastate God by committing a suicide, by committing a homicide, or by committing a suicide and a homicide simultaneously.

Unification Scientists will work with International Psychiatrists and with world leaders to stop wrongful deaths from continuing to happen by getting these severely ill people the psychiatric treatment that they need.

## Educators Will Elevate Students' Achievements

Unification Scientists will work with educators from all over the world to help students to achieve unprecedented levels of academic success. There are also other types of success that these students need to achieve.

These students have to have advanced family planning training. They must understand the role that God plays in the conception, creation, birth, and development of a new human life. Our young adults must understand the consequences that await them if they engage in high-risk sexual behaviors. Our young adults must understand what birth control devices are, what they do, and how they work. Our young adults have to understand what they need to consider before they choose their sexual orientation and pursue their relationships in young adulthood and in adulthood.

Students will understand the demons of substance abuse. They will understand that it will be in their best interests to stay away from tobacco, alcohol, and illegal street drugs. It will be part of their relationship with God for them to understand that these harmful substances can do nothing but to hurt them in their young adult lives and in their adult lives.

Young adults will come to understand the role that God will be playing in their lives. Young adults will learn to respond to their destiny, the Will of God, and guidance of God, and the love of God. They will understand how to show remorse to God for their mistakes.

## God Is a Part of All of Our Lives

Unification Scientists will help all of us to understand that God is part of all of our daily lives. God keeps us alive. God guides us. God helps us to perform in school and at work. God helps us to deal with our problems. God helps to guide us away from doing things that are detrimental to our wellbeing and to the wellbeing of our family members, of our coworkers, and of our good friends.

God can communicate with us in many different ways. God can send us an idea. God say something to us. God can warn us that something is wrong. God can help us to fix problems. God can guide us to set goals and to accomplish tasks.

God teaches us to love each other. God teaches us to care for people that are less fortunate than ourselves. God helps us when we need that help from him. God also teaches us how to help Him to help others that are in need of help.

God leads us to success and happiness in our lives. God is a healing force that helps us to recover from illnesses and from injuries that we have endured in our lives.

God introduces us to our friends and to our loved ones. God helps us to find our spouse. God helps us to develop our children. God helps us to understand how to discipline children correctly.

God works with all of us to maintain a successful family and a successful peer group in both schools and at work.

## The Achievement of Unification with God

We will have finally achieved our unification with God when we have come to understand that God loves us and that we love God. We have to understand that God loves us in many different ways. God helps us to achieve success in school. God helps us to achieve success in our careers. God helps us to achieve success in our relationships. We have relationships with our spouse, with our kids, with other family members, and with our peers.

It would be a wonderful achievement for all of us around the world to create a planet that would exist without violence, without poverty, without homelessness, without starvation, without diseases, without life-threatening conflicts between each other and between ourselves and God. It would be a wonderful world if we could achieve a final lasting peace with God that would allow us to live with each other without facing daily pain and suffering.

We can achieve a Universal Unification with God through Science that will make our Human Family a better experience for ourselves and an even better experience for our descendants. We can live with each other without needing to hurt each other and/or to kill each other.

We can exist here without needing to have hateful thoughts about hurting ourselves and about hurting others at the same time. We can teach our kids all over the world about stopping suicides and homicides. We can talk to them about stopping God's suffering when we fantasize about hurting each other.

We can do better for ourselves and for God by achieving and existence for ourselves and for our children that will be free of violence, suffering, homicides, suicides, and wrongful deaths. God deserves this existence from us and we deserve this existence from Him.
