

Services Procurement

From Smart ERP Solutions, Inc.

Own the Account

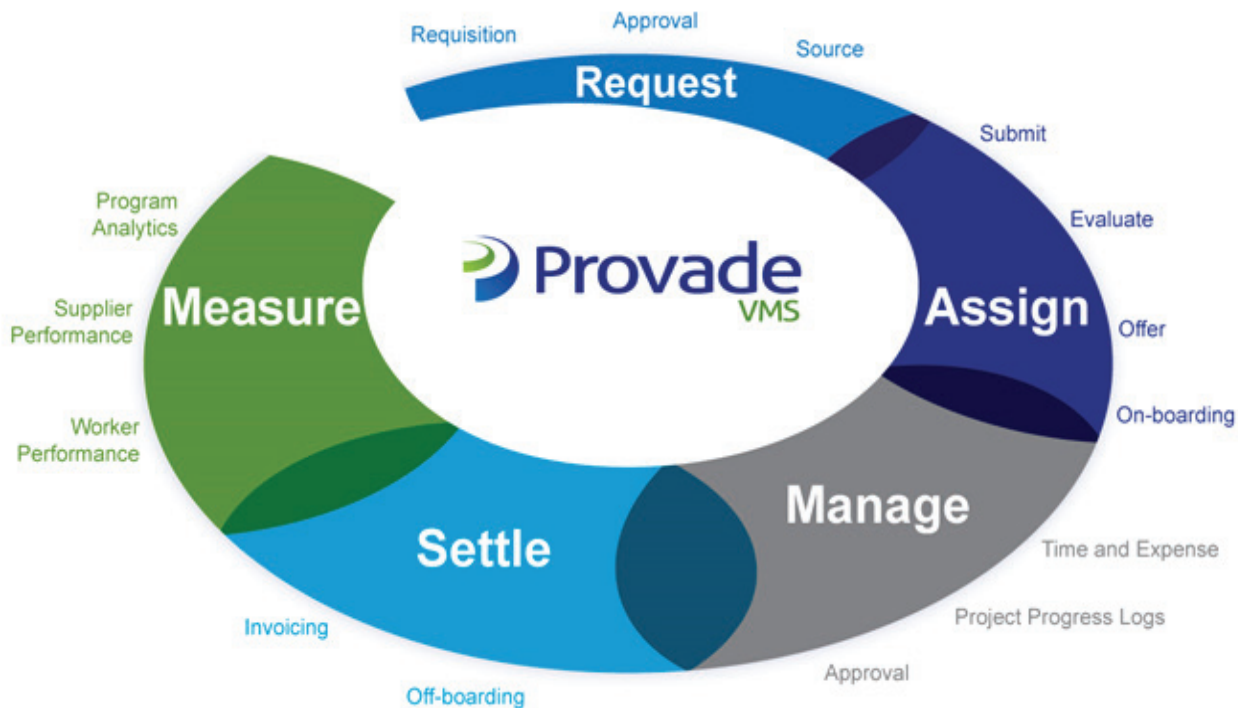

To most customers you are one of many suppliers, competing for every placement. Why is this? Because your customer doesn't have a single place to go to make all of their requests. Give them one place to easily interact with you and your ability to help them manage their services procurement. If you give your buyers an easy one-stop-shop for all their business needs, they'll always come to you first. Provade is exactly that—your own system that puts you ahead of your competition.

Automate and Simplify

Provade is a highly configurable, branded solution that puts you on your customer's desktop and mobile device automatically—ready to respond to their every need. With your company name and logo front and center, your customer will simply think of you first whenever making business decisions.

End-to-End

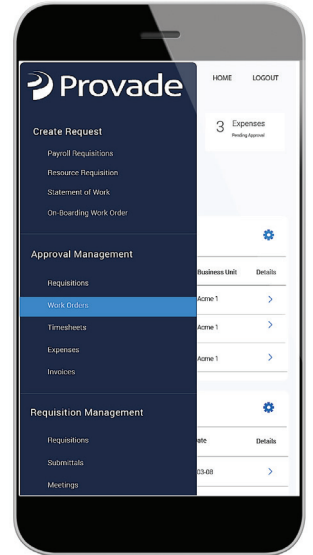

Provade facilitates the complete services procurement process. From the moment your customer has a need, through candidate review and selection, assignment management, time and expense capture to invoicing, you will automate and simplify their every action. And when you are ready, we'll integrate with all your other business management systems.

Complete Program Management

Mobility

Unlike other systems that offer minimal access and limited modules on mobile devices, all features and workflows are fully accessible on any mobile device. The user experience is responsive, meaning it automatically adapts and adjusts to the size, shape and orientation of any screen you, your customers and workers use.

Efficient and Rapid

Our system is architected to maximize efficiency and minimize maintenance. Data can be shared across customers so you can bring new accounts online in no time. There is no lengthy implementation and you are not dependent on your software provider or a systems integrator to get new customers live.

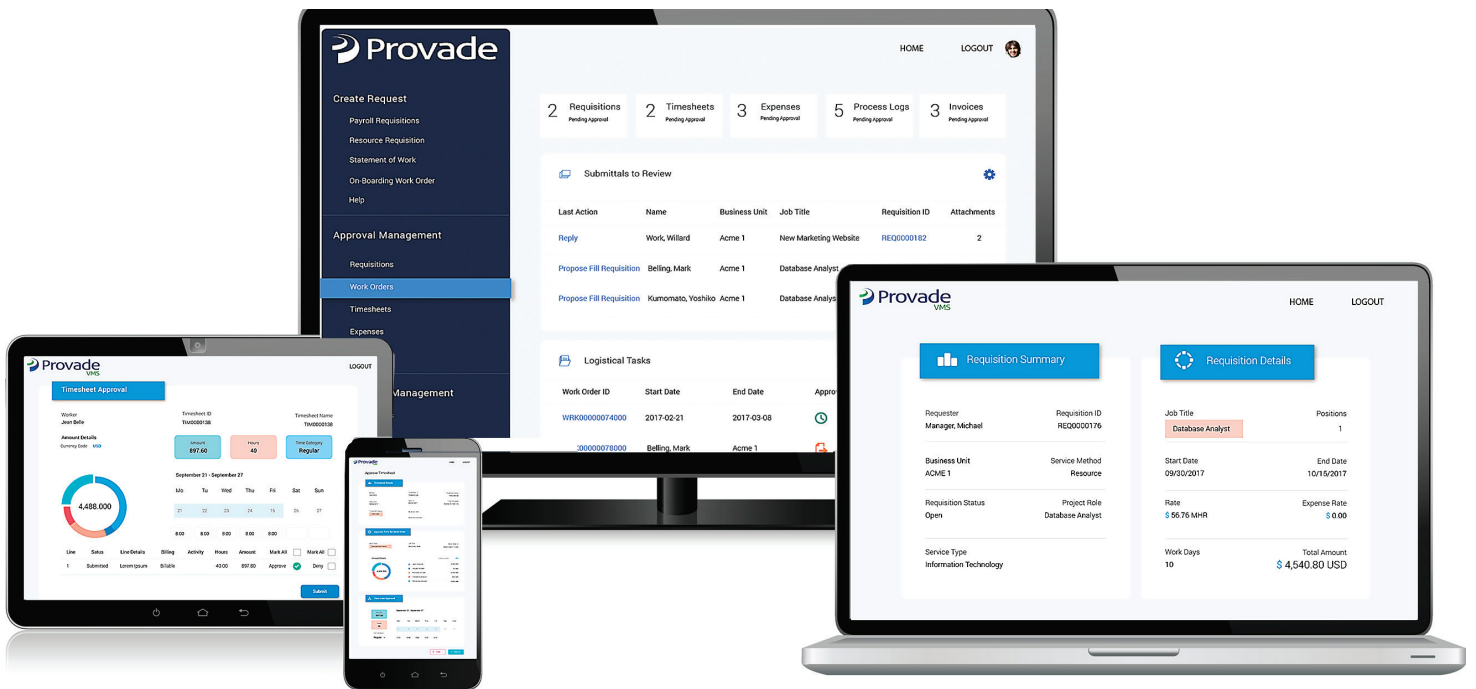

Reliability

Your customers demand excellence and performance. If they can't access the solution you provide then they will go elsewhere. Provade has maintained the industry's best uptime (Over 99.99%*) for 14 years, with ZERO major system outages in that time. No other system in the industry can say the same.

* Monitored/verified by independent third parties

Service

We operate as your partner, with 24/7/365 service and global coverage. Your personalized Provade support team is available online and by phone whenever you need our help. Whether it's a simple question or you need our input on a configuration, we are always available because your success is our success.

Automate And Simplify The Process of Managing Services Procurement
