Envirosight Releases Paper on Manhole Inspection

New resource sheds light on how cities can support infrastructure improvements with manhole inspections.

Randolph, NJ—June 19, 2018— Envirosight, a leading manufacturer of underground pipeline inspection equipment, has released a new white paper, *Rethinking Manhole Inspection: A New Way to Reduce I&I Quickly and Cost-Effectively*. The public's renewed focus on regional infrastructure provides an opportunity for wastewater systems to increase funding and rehabilitate systems. Yet it also brings increased scrutiny and accountability, demanding that operators find efficient solutions at low cost.

This white paper discusses why manhole inspection and rehabilitation is a cost-effective addition to many maintenance programs and reviews the latest developments in automated manhole inspection technology.

Many utilities focus their inflow and infiltration (I&I) abatement efforts on pipeline inspection and rehabilitation and neglect access points. "Inspection is a pivotal first step in rehabbing manholes," says Jake Wells, Director of Marketing for Envirosight. "But so often, manholes end up forgotten entirely. This white paper serves as both a case study on the effectiveness of manhole inspection and a guide to help contractors and municipalities choose the right manhole inspection system for their needs."

To access the paper and learn more about the benefits of modern manhole inspection solutions, download a copy at <http://inbound.envirosight.com/rethinking-manhole-inspection>. This white paper was created as part of Envirosight's commitment to providing resources for wastewater industry professionals.

About Envirosight LLC

Randolph, New Jersey-based Envirosight, LLC provides sewer cameras and other pipeline inspection solutions to municipalities, contractors, departments of transportation, and civil/environmental engineers. Envirosight is a full-service manufacturer of robotic sewer inspection crawlers, zoom cameras, push cameras, inspection reporting and asset management software, and inspection vehicles. Envirosight is committed to ongoing innovation, delivering products that enhance user productivity and inspection detail. Envirosight serves customers through a trained network of regional sales partners who deliver localized support and expertise with rapid turnaround. All Envirosight technical employees hold NASSCO PACP certification. Visit Envirosight online at www.envirosight.com
