SINCE 1963
ATLANTIC **AU** **ULTRAVIOLET**
CORPORATION®

ABOUT US

Since 1963, Atlantic Ultraviolet Corporation® has pioneered the discovery and development of beneficial uses of ultraviolet energy. Over the years

these efforts have led to the

development of valuable, cost effective and environmentally sound techniques and products now known and respected throughout the world.

The UV Application Specialists at Atlantic Ultraviolet Corporation® assist customers in the selection of germicidal lamps and equipment. Their specialized knowledge is a valuable resource in formulating effective and cost-conscious ultraviolet solutions.

Extensive inventories and a dedicated staff enable Atlantic Ultraviolet Corporation® to fulfill its commitment to provide fast deliveries and responsive customer service.

GERMICIDAL ULTRAVIOLET

Ultraviolet is a unique and rapid method of disinfection. It utilizes germicidal ultraviolet lamps producing short-wave radiation at 254 nanometers (nm)—a wavelength highly lethal to bacteria, virus, and other microorganisms.

An ever growing range of industries and consumer applications have found ultraviolet to be the ideal solution for their air and surface treatment needs.

Atlantic Ultraviolet Corporation® equipment and systems are manufactured in the USA.

ADVANTAGES

Efficient

High efficiency **Surelite™**
Electronic Ballasts power up
Sanidyne® Ultraviolet Portable
Area Sanitizers.

Straightforward

Simple use and maintenance.

Fast

A room as large as 1,000 square
feet can be treated in 15 minutes.
(Larger spaces require more time,
see charts on page 11.)

Effective

Disinfects both air and exposed
surfaces utilizing germicidal
ultraviolet (UV-C) wavelength lamps.

Durable

Polished Stainless Steel.

Portable

Fixture is easily transported
from one area to another.

Safe

Sanidyne® Prime Remote
and **Sanidyne® Plus** have
occupancy sensors to prevent
encroachment incidences.

Easy to Use

Fixtures are controlled via
electronic keypad.

PRINCIPLE OF OPERATION

The **Sanidyne®** Ultraviolet Portable Area Sanitizers have been carefully conceived to provide germicidal UV disinfection for purifying air and exposed surfaces in an **unoccupied** area by means of 8 germicidal ultraviolet lamps. These special lamps generate high levels of germicidal ultraviolet radiation lethal to infectious microorganisms such as bacteria, mold, and virus.

The ultraviolet disinfection dosage is a function of time and intensity to which the air and surrounding surfaces are exposed. Our UV Application Specialists would be happy to perform the necessary calculation to ensure the sanitizer we provide is appropriate for your particular application.

The operation of the **Sanidyne®** is as follows:

1. Clear room of all occupants (**Sanidyne®** can only be used in **unoccupied** areas). Affix warning signs (included) onto all doors of the room that is to receive the **Sanidyne®** disinfection.
2. Treatment time is set, start button engaged, built-in 1 minute, 30 second delay allows time for operator to leave area.
3. Ultraviolet rays are projected within the **unoccupied** area, for the programmed period of time.
4. The air and exposed surfaces within the room are disinfected. The infectious microorganisms such as bacteria, mold, and virus are inactivated.
5. The **Sanidyne®** treatment cycle ends. Its compact size and lightweight design allows it to be easily moved to the next location that needs disinfection.

SPECIAL FEATURES

Sanidyne® Prime Ultraviolet Portable Area Sanitizer

STER-L-RAY® High Output Germicidal Ultraviolet Lamps

Specially designed high output lamps provide the utmost in quality, sustained output, and longevity (see page 10 for information). **ArmorLite™** Safety Shield is a protective envelope applied to the germicidal lamps. It provides increased security by eliminating the dangers associated with broken lamps.

Lamp Guard

Stainless steel cage that protects **STER-L-RAY®** lamps.

Stainless Steel Construction

Manufactured in Type 304 stainless steel for unparalleled strength, durability, and an attractive finish.

Surelite™ Ballasts

State-of-the-art electronic ballasts specifically developed for the operation of ultraviolet lamps. Versatile, programmed start ballasts provide higher lamp output; are smaller, lighter, more efficient, and operate cooler for longer life.

24-Hour Interval Timer

Easy programmable timer, allows treatment time to be customized to room size.

Promate™ Warning Signs (2)

To be affixed to entry door(s) to warn that an ultraviolet sanitizer is in use and that the treatment area should not be entered.

Sanidyne® Prime is for use only in **unoccupied** areas.

Observation Ports (4)

Located on top of the **Sanidyne® Prime**, these ports allow inspection of the lamps with storage cover on, without the risk of ultraviolet exposure.

Steadfast™ Bayonet Socket Mount Lamp Holder

Bayonet Socket Mount four-pin lamp holder, fastens the lamp securely while providing convenient, "quick and easy" lamp change.

1-Minute, 30-Second Audible Exit Warning

After start button is engaged, an audible warning sounds for 1 minute and 30 seconds, allowing operator time to leave the area before disinfection cycle begins and ultraviolet lamps are switched on.

Promate™ UV-Blocking Face Shield

(not shown, 1 supplied with this model) Lightweight visor with adjustable headgear provides eye and face protection from germicidal UV rays.

SPECIAL FEATURES

Promate™ Elapsed Time Indicator

Real-time, non-resettable display of accumulated operating hours.

Cord Wrap

Convenient cord storage when Sanidyne® Prime is not in use.

Power Switch

Handle

Provides substantial grip when moving Sanidyne® Prime.

Removable Rigid Storage Cover

Made of polished stainless steel to protect the **STER-L-RAY®** Germicidal Ultraviolet Lamps from breakage while transporting and/or storing the Sanidyne® Prime and allows inspection of lamps in operation.

② Ultraviolet Output at 254 nanometers at 100 hours and 80 degrees F (approximate).

GENUINE STER-L-RAY® GERMICIDAL LAMPS

STER-L-RAY® Germicidal Lamps are short-wave, low-pressure mercury vapor discharge tubes that produce ultraviolet wavelengths lethal to microorganisms. Approximately 95% of the ultraviolet energy emitted from **STER-L-RAY®** Germicidal Ultraviolet Lamps is at the mercury resonance line of 254 nanometers, the region of germicidal effectiveness most destructive to bacteria, mold, and virus.

STER-L-RAY® High Output (HO) Germicidal Ultraviolet Lamps are similar in size and shape to conventional germicidal lamps but capable of operating at higher input power and current. The HO lamps yield more UV watts than standard UV-C lamps of the same length.

ArmorLite™ protective coating is applied to **STER-L-RAY®** Germicidal Lamps in all **Sanidyne®** models, ensuring protection for employees, products, and work environments by eliminating the dangers associated with broken lamps.

STER-L-RAY®, ArmorLite™, Sanidyne® Prime, Sanidyne® Prime Remote, Sanidyne® Plus, and their appropriate logos are trademarks of Atlantic Ultraviolet Corporation®.

CAUTION: Exposure to direct or reflected germicidal ultraviolet rays will cause painful eye irritation and reddening of the skin. Personnel subject to such exposure must wear suitable face shield, gloves and protective clothing.

ULTRAVIOLET DOSAGE

Germicidal lamps provide effective protection against microorganisms. A small cross-section is shown below.

ORGANISM	ALTERNATE NAME	TYPE	DISEASE	DOSE*
<i>Corynebacterium diphtheriae</i>	<i>C. diphtheriae</i>	Bacteria	Diphtheria	6.50
<i>Legionella pneumophila</i>	<i>L. pneumophila</i>	Bacteria	Legionnaire's Disease	2.70
<i>Mycobacterium tuberculosis</i>	<i>M. tuberculosis</i>	Bacteria	Tuberculosis (TB)	10.00
<i>Pseudomonas aeruginosa</i>	<i>P. aeruginosa</i>	Bacteria		3.90
<i>Serratia Marcescens</i>	<i>S. marcescens</i>	Bacteria		6.160
<i>Staphylococcus aureus</i>	<i>S. aureus</i>	Bacteria		6.60
<i>Staphylococcus epidermidis</i>	<i>S. epidermidis</i>	Bacteria		5.80
Adeno Virus Type III		Virus		4.50
Coxsackie A2		Virus		6.30
Influenza		Virus	Flu	3.40

* Nominal Ultraviolet dosage (mJ/cm²) necessary to inactivate better than 99% of specific microorganism. Consult factory for more complete listing.

APPLICATIONS

Sanidyne® Ultraviolet Portable Area Sanitizers disinfect air and surfaces in **unoccupied** areas by means of 8 **STER-L-RAY®** Germicidal Ultraviolet Lamps. The **STER-L-RAY®** lamps generate high levels of germicidal ultraviolet radiation lethal to bacteria, mold, virus, and fungi. The compact size and lightweight design of **Sanidyne®** Portable Area Sanitizers conveniently allows them to be moved from one location to another, providing disinfection wherever and whenever necessary.

Typical applications for the **Sanidyne®** include: Operating Rooms, Patient Rooms, Laboratories, Clean Rooms, Open Work Space, Homeless Shelters, Auditoriums, Hotel Rooms, Gymnasiums, Morgues, Open Office Areas, or areas where permanently mounted fixtures are not an option.

The **Sanidyne®** Ultraviolet Portable Area Sanitizers do not require professional installation. Access to the room **must** be avoided when **Sanidyne®** is in operation.

Note: Dose shown above is expressed as mJ/cm² (millijoule per square centimeter).
