

**You can't get specifics from something made to serve everybody. That's why our specialized solutions are designed to fit you.**

Net Health's EMR, practice management, and professional services solutions target the complex and highly-specialized healthcare settings dealing with the biggest workflow and compliance challenges.

**We are the leader in software solutions for specialized outpatient care.** Our fully interoperable EMR solutions offer an end-to-end experience that includes practice management tools like billing and scheduling, clinical documentation, RCM, expert coaching, and analytics.

## **Boost patient throughput, improve the quality and completeness of your documentation, and drive accuracy in billing compliance.**

Our suite of industry-proven products deliver fully-configurable workflows that are built to drive efficiency while supporting optimal patient care. Net Health solutions integrate with the largest names in healthcare (Epic, Cerner, Meditech, and more) so your specialized care data populates the patient's longitudinal health record.

### **Agility®**

Agility® serves Employee Health, Occupational Medicine, and Urgent Care settings. It provides one integrated tool to hospitals and health systems, outpatient centers, private practices, and companies required to navigate a host of regulatory, compliance, privacy, and billing concerns.

### **ReDoc®** powered by xfit®

ReDoc® drives PT, OT, and SLP documentation in hospitals and health systems, outpatient centers, private practices, long-term care, and home health settings.

### **WoundExpert®** powered by xfit®

WoundExpert® is the basis for workflow and documentation success in outpatient centers, long-term acute care, long-term care, skilled nursing facilities, as well as supporting independent wound care physicians and small practices.

**Net Health serves healthcare professionals in 98% of the largest hospital chains in the US as well as private practices around the country**—driving workflow in more than 3,000 urgent care, wound care, physical therapy, speech and language therapy, occupational therapy, occupational medicine, employee health, and workplace medicine facilities each day.
