EagleView OnSite™ Integral to Allstate Winning Novarica Impact Award

Partnership leads to award for revolutionizing the property insurance claims process

Bothell, WA (June 26, 2018) – [Eagle View Technologies](#) (“EagleView®”), the leading provider of aerial imagery and property data analytics, partnered with Allstate to successfully launch an innovative claims process with [EagleView OnSite™](#), which the 2018 Data/Analytics Novarica Impact Award has recently recognized. This award is presented to a carrier who is utilizing technology to better service their customers and the claims industry. A panel of more than 50 CIO members from the Novarica Insurance Technology Research Council reviews nominations and selects award recipients annually. The winners are chosen based on their disruption and improvement of the overall claims insurance process.

In 2017, EagleView designed and built a virtual claims inspection solution to improve the efficiency of property insurance claims following a catastrophic event. This solution included the use of high-resolution aerial imagery captured from various sources, such as drones and fixed-wing aircraft, as well as data analytics to improve the cycle time of closing of claims.

“We’re thrilled to receive an award not only recognizing our innovation in the industry, but the overall improvement of the claims process as well,” stated Bonnie Lee, Vice President, Allstate Property Claims. “EagleView and Allstate successfully collaborated, which has allowed us to best serve our customers’ needs.”

This virtual claims inspection solution is known as [EagleView® OnSite](#). By working with EagleView, an innovator in the aerial imagery and data analytics space, Allstate was able to leverage imagery and data from multiple sources including fixed-wing aircraft and drones. This enabled adjusters to more quickly and efficiently triage claims, virtually inspect properties from their desktops, and ultimately close property and casualty claims faster than ever before.

Since partnering with EagleView for virtual claims inspection, Allstate has improved the cycle time from first notice of loss (FNOL) to settlement for wind or hail claims by 30 to 40 percent and has increased overall adjuster efficiency by 50 to 60 percent.

“Allstate has continued to show how forward-thinking they are in the insurance space,” said EagleView CEO Rishi Daga. “We’ve been honored to work with them on this project, and we’re excited for them to be recognized as innovators with this award.”

This innovative solution shined in the Data/Analytics category with its integration of EagleView’s high-resolution aerial imagery and roof and wall measurement reports into Allstate’s existing claims workflow.

“Allstate’s drones initiative with EagleView is a great example of how embracing new technology leads to real business impact for insurers,” said Novarica CEO Matthew Josefowicz. “Our insurer CIO council

members selected this initiative not just because it was innovative, but because it improved Allstate's claims capabilities in a tangible way."
