**FOR IMMEDIATE RELEASE**

**Shield Global Partners Successfully Completes SOC 1 Type 2 Audit**

*Assure Professional examined the P&C Auto insurance industry expert's Diminished Value Recovery system, demonstrating its security.*

**De Pere, WI (July 2, 2018)** — [Shield Global Partners](#), a leading full-service solutions provider for fleet vehicle leasing companies specializing in determined and qualified loss recovery, has completed a Service Organization Controls (SOC) 1 Type 2 examination. The audit was performed by [Assure Professional](#) - a leading cybersecurity, assurance and compliance solutions provider. Shield Global Partners' Diminished Value Recovery system was examined utilizing the SSAE 18, SOC 1 Type 2, reporting standard as established by the [American Institute of Certified Public Accountants](#) (AICPA.)

"We were eager to work with Shield Global from the very start. They are an exciting organization delivering high quality services to their clients," said William Holman CPA, Assure Professional (Accounting and Audit Partner.)

The SOC 1 Type 2 examination is a recognized compliance standard from the AICPA. The process requires a thorough review of established principal sectors of its policies, procedures, technologies and controls. Compliance is determined by a qualified, independent auditor, who confirms an organization has accurately described its systems and controls, that the described controls are in place, and that the controls are designed to accomplish stated financial control objectives as of a specific date in time.

Shield Global Partners successfully performed the SOC 1 Type 2 audit, demonstrating the design and operating effectiveness of internal control over financial reporting (ICFR.)

Shield Global Partners specializes in leased vehicle monitoring and management, identifying accidents in near real-time. Shield's custom VIN Monitoring service is just the first step in a full-service operation that provides equity reconciliation and recovery processing from beginning to end. With decades of auto and insurance industry experience, Shield's seasoned leadership team has written the book on appraisal methodology, which has been adopted by most of the P&C Auto Insurance industry in North America. For more information on Shield's process and services, visit [shieldglobalpartners.com](http://shieldglobalpartners.com).
