

## PHARMRIGHT CORPORATION RECEIVES CAREGIVER FRIENDLY® AWARD

### Today's Caregiver Magazine's Honors Livi®

July 3, 2018: Charleston, SC: PharmRight Corporation, a healthcare technology company based here, announced today that Livi® has been awarded a 2018 Caregiver Friendly® award in the PRODUCT category. Livi® is a revolutionary, fully-automated and cloud-connected home medication dispensing system designed to create more independence for chronically ill and aging individuals.

“We are honored to receive the prestigious 2018 Caregiver Friendly Award®,” said Bill Park, President and CEO of PharmRight. “We believe Livi is the best solution for families caring for a love one with a complex medication regimen, and we are committed to helping improve the quality of life for everyone involved in the caregiving continuum.”

“The average caregiver is responsible for over \$40,000 in health related expenditures each year, in either personal or directed funds,” says Gary Barg, Editor-in-Chief of Today's Caregiver magazine. “This award is designed to help family caregivers recognize and reward those organizations who will care for them in as committed a manner as they care for their loved ones.”

#### **About PharmRight**

PharmRight Corporation was formed in 2013 to produce devices and offer services that maximize medication adherence and allow patients to age in place. The company's first product is Livi®, advanced, extremely reliable and fully-automated home medication dispensing system managed by an intuitive cloud-based application making real time monitoring of medications quick and easy. Livi® simulates the supervision of an on-site caregiver by prompting the user to take the right medication...at the right time...in the right quantity...with the right instructions. The cloud application monitors and captures all user interactions with the device. Family members and professional caregivers can be alerted via text message or e-mail if a user misses a dose or requires a re-fill. Comprehensive medication adherence reports are available via computer and mobile devices.
