BlackHawk DATACOM Wins Federal Government Engineering Contract

BlackHawk DATACOM has been providing large-scale engineering services for electronic warfare system design and fabrication since 2001

LAFAYETTE, LA July 26, 2018 - BlackHawk DATACOM has secured a federal government subcontractor agreement valued at \$4.3 million over 3 years

As part of the overall contract, BlackHawk DATACOM is responsible for providing hardware, firmware, and software design services as well as manufacturing, testing, and commissioning services including:

- Complex analog/digital circuit design
- System level RF design
- System level equipment rack design
- Software and firmware engineering
- Mechanical CAD design, fabrication and light machining
- Component, sub-assembly, and system design verification testing
Assembly and testing of complex circuit boards, sub-systems and systems

“This contract is a testament to the quality and technical expertise of our Engineering Services team and their ability to provide innovative solutions for extremely complex system design requirements. We are very excited about the award of this contract and the opportunities that it will provide for our shareholders and our employees,” stated John Poindexter, Chairman and CEO for BlackHawk.
