Introduction Letter

Index

1. The Company

Documents, whether printed or electronic, are the standard communication media for any public or private enterprise, and upon which to a large degree an organization's corporate image depends. If in addition to this we add the fact that more and more regulations are obligating companies to keep tight control of their documentation and to offer their customers a telematic means of communication, we can get a rough idea of the importance that document software is to the life of any organization.

Julio Olivares realized this when document technology was in the early stages of development. From his work with very prominent companies in the Banking and Insurance Sectors, he could see that there were some needs in these areas that weren't being covered. As a result, DocPath was founded in 1992 with one clear objective: cover the entire document life cycle.

The way has not been easy and DocPath has had to compete with important enterprises in the technology sector. But it has managed to establish a niche in this market and today it has offices in Spain, the United States, Brazil and Chile. It also has a partner network that offers local support to its customers anywhere in the world.

Many companies have not remained secluded from the revolution that DocPath´s arrival has brought to the market. In fact, today there are over 50.000 installations of its products worldwide, and among its customers are such prominent names as BBVA, Santander, Liberty, Mapfre Group, DHL and Danone.

2. Innovation, a priority

If there is anything that characterizes DocPath, it is its strong commitment to innovation. DocPath has two software factories in Spain, one in Madrid and another in Ciudad Real, where a team of highly qualified professionals researches new technologies that will be needed for the future.

Thanks to this highly qualified investigative team, DocPath solutions are modular, scalable and perfectly integrable with any organization's existing business systems. In a world that is increasingly moving toward standardized applications, it makes very much sense to avoid acquiring applications that can not communicate with each other.

DocPath is aware of this reality and offers each enterprise only the solutions it needs to increase its productivity and optimize its business results. As an enterprise grows, it can add additional modules, without having to perform new installations.

Because of all of this, DocPath is simply "a step ahead in document software."

3. Advantages

Some DocPath advantages:

- Multilanguage: Capacity to use various languages within the same form.

- Static and dynamic designs.

- One-dimensional and two-dimensional barcodes.

- Integrated simulator to see in real time how a document will look when it is printed or distributed electronically.

- Control of form versions and their comprising objects.

- Fully integrable solutions that support document design and processing for Web environments as well as print environments, electronic distribution (email & fax) and storage and retrieval.

- Multiple input formats: spool files, plain text, XML, record mode, etc.

- Direct database access for data retrieval.

- Multiple output formats: PCL, PostScript, AFP, PDF, RTF, Excel, Labels, XML, etc.

- Multiple environments: distributed, hybrid, centralized.

- One product for batch production, office networks, Internet environments, etc.

- Multiplatform: Windows, Linux, Unix, AS/400, zSeries.

- Improved document quality and corporate image thanks to an easy-to-use, intuitive professional design tool.

- Printing control with individual and department level printing quotas.

- Integration with market leading ERP's: JD Edwards, SAP, Oracle ...

- Integration with different document managers (Documentum, FileNet, Content Manager...).

- Support: Standard (8x5), extended (12x5) or integral (24x7).

- Possibility of renting: If you do not wish to purchase our software licenses, you can rent them for a fixed monthly fee and enjoy all the benefits of our solutions without carrying out a major investment.
