

OUR STORY:

Multi Radiance Medical is a global leader in Laser Therapy for pain relief and accelerated recovery. The Super Pulsed Laser technology developed by Multi Radiance traces back to quantum research laboratories 30 years ago. More of a "mission" than a "business plan," hundreds of researchers with million-dollar budgets developed an extraordinary and groundbreaking synergy of laser, light and magnetic field that revolutionized healthcare for space travelers. Four generations later, Multi Radiance Medical, based in Solon, Ohio, has continued that inspiration and innovation and has recently introduced the MR5 ACTIV PRO and MR5 ACTIV PRO with LaserStim™. These products are the most validated, optimized and unrivaled therapy lasers in the world.

Multi Radiance Medical remains dedicated to sound research, industry advancement and maintaining the utmost professional integrity. The company partners with the most respected researchers in the field to provide invaluable guidance with regard to the design of the devices with direction of clinical research. In three separate scientific monographs Multi Radiance Medical has proven how and why its technology works, without limitations, and currently there are multiple clinical trials being conducted around the world.

Multi Radiance is taking the responsibility to set new standards for the industry by setting the bar high on research and validation. Having proven its technology works in vivo, in vitro, in controlled laboratory trials, and in clinical trials, Multi Radiance is now setting its sights on assuming market leadership by turning its current research into future treatment opportunities for those disease states and conditions that do not have an adequate current treatment, and in those cases where there is no current treatment at all. Multi Radiance remains committed to the on going clinical and scientific studies of its devices, to push new industrial product designs, and become the innovative leader in the field. This commitment will yield many new discoveries and move light based medicine forward into the future and toward mainstream acceptance

OUR PRODUCTS:

Super pulsed infrared laser (905 nm) is the essential component of Multi Radiance Medical technology. Multi Radiance Medical super pulsed lasers deliver billionths-of-a-second pulses, combined with up to 50,000 mW of peak power for a higher concentration of light energy photons, driven deeper into the target tissue without any risk of overheating. Multi Radiance's line-up of devices combines synchronous super pulsed laser along with ultra-bright infrared, red & blue LEDs all in a cordless, portable design, for in-clinic therapy or on-the-go treatment. Multi Radiance technology delivers consistent and reproducible outcomes.

HUMAN DEVICES

MR5 ACTIV PRO LASERSTIM

The next generation in cordless laser therapy, combining Laser and Electrical Stim. The World's first and only FDA registered cordless Laser with TARGET and DOSE technology.

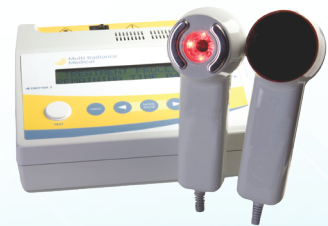

MR4 ACTIV™

Professional / Amateur athletes alike use the cordless MR4 ACTIV to temporarily relieve acute and chronic pain, reduce stiffness and muscle spasms, increase microcirculation and more; in the training room, on the field, or on the road.

PAINAWAY POST-OP™

The cordless, portable PainAway Post-Op™ laser provides temporary pain relief and enhances post-operative care for patients in the comfort of their own homes.

MR4 ULTRA PACKAGE™

The most preferred laser in the world, offering the LaserStim™ emitter with TARGET™ & Dose Technology, along with a LaserShower™ for treating large muscle groups.

Multi Radiance
Medical®

VETERINARY DEVICES

MR4 ACTIVET PRO

Validated - Optimized - Unrivaled. The most powerful, portable, and affordable therapeutic laser for veterinary use, featuring blue light and 50 Watts of power.

MR4 ACTIVET PRO LASERShower

A cordless, portable laser therapy system offering surface area coverage greater than 4x that of standard emitters. The ACTIVet PRO LaserShower provides faster treatment times for large companion animals and Equine.

MR4 ACTIVET

Cordless super pulsed veterinary laser, with the power to treat deep conditions and the safety to use anywhere. Featuring 25 Watts of power and blue light; the ACTIVet is an excellent choice for Equine client rentals.

MY PET LASER

Reduce pet stress, extend therapy into the home and enhance practice income. Veterinarians can now rent My Pet Lasers to pet owners to deliver pain relief in the comfort of their homes.
