Trideum Corporation Awarded Cybersecurity Vulnerability Assessment Test Environment (CVATE) Prime Contract

August 23, 2018 (Huntsville, Ala and Orlando, Fla) - Trideum Corporation, an Inc. 5000 company headquartered in Huntsville, Alabama, has been awarded the Cybersecurity Vulnerability Assessment Test Environment (CVATE) prime contract with the Consortium Management Group/Consortium for Command, Control, and Communications in Cyberspace (C5) Other Transaction Authority (OTA). Trideum's CVATE single award contract has a ceiling value of \$37.2 million over a four-year period of performance.

Trideum's role is to prototype the innovative cyber test environment that is part of an overall system of systems test capability being established at the U.S. Army Test and Evaluation Command (ATEC) at Redstone Test Center (RTC) in Alabama.

"Trideum is proud to support the Army Test and Evaluation community under the CVATE contract," said Mr. Kurt Lessmann, Chief Technology Officer at Trideum. "As we begin to prototype the cyber test environment, we look forward to putting the best creative talents to work to deliver a strong cybersecurity test capability for the Army."

About Trideum

Founded in 2005, Trideum is headquartered in Huntsville, Alabama, and specializes in test and evaluation, modeling and simulation, training, education, systems engineering and analysis, and information technology solutions.
