DROPSUITE, IT'S A NO-BRAINER.

Great Value: For the cost of a cup of coffee each month, a company's email files, calendars, attachments and tasks can be protected against the threat of ransomware, accidental data loss, or sabotage.

Fills a Backup Performance Gap: Office 365 doesn't backup deleted emails for more than 30 days. But Dropsuite gives you uninterrupted backup coverage in the cloud, with unlimited storage and retention.

Gain Peace Of Mind: Threats to company data have never been higher. In the same way businesses insure their companies from liability, fire damage or theft — every business needs to be backing up their emails.
