

EVERYWHERE EC-100

SAFE—CONNECTED—PRODUCTIVE

GLOBAL SATELLITE COMMUNICATIONS FOR FIELD PERSONNEL

The EVERYWHERE Communicator EC-100 is a handheld device that provides Global SOS, secure personnel and team tracking and communications to provide mobile situational awareness and duty of care for your company's most important asset, your people.

The EC-100 combines an Iridium® Short Burst Data (SBD) modem for global communications, GPS and a Bluetooth link to the EVERYWHERE Smartphone App to enable communications among personnel and teams in the field.

Integrated with the EVERYWHERE Hub, the EC-100 enables end users to communicate with the Hub, as well as with other Communicators and Smartphone App users. In addition, the EC-100 tracks the user's location, and supports a two-step SOS activation.

The device can operate in standalone mode or paired via Bluetooth to the EVERYWHERE Smartphone App. In addition, the device supports both predefined and freeform text messages. The EC-100 also features a programmable hotkey, enabling the user to perform a customer-defined operation using a single step.
