

## 2018 CALNOC Annual Performance Excellence Awards

The Collaborative Alliance for Nursing Outcomes (CALNOC) is pleased to recognize hospitals for their exemplary work in reducing hospital acquired conditions in 2017.

### *Award Criteria*

#### Best Performance in Preventing Injury Falls

**Measure:** Percent of Reported Falls Resulting in Moderate+ Injury or Greater (Adult Acute Care)

**Award Criteria (by ADC):**

**ADC <200:** Zero 'Moderate or greater Injury Falls' All 4 quarters

**ADC 200+:** Zero 'Moderate or Greater Injury Falls' 3 or more quarters, or average for year < 1%

#### Best Performance in Preventing Hospital Acquired Pressure Injury

**Measure:** Percent of Patients with Hospital Acquired Pressure Injuries Stage II or Greater (Adult Acute Care)

**Award Criteria (all hospitals):**

1. Zero HAPI II+ All 4 Quarters

OR

2. Risk Adjusted HAPI II+ "Better than Expected" \*

\*2017 Data predicted in risk adjustment analysis by patient characteristics and 2015-2016 performance. Note: For HAPI 2+, hospitals are not separated by ADC. Risk Adjustment applies to all hospitals but is most applicable to large and medium hospitals if "expected" number of patients with HAPI 2+ is 5 or more.

## Best Performance in Preventing Hospital Acquired Infections – CLABSI, CAUTI, MRSA and CDIFF

**Measures:** Observed Infection Rate (data downloaded from CDC-NHSN). Calculation method applies to all individual infection types for total facility data on CLABSI, CAUTI, MRSA, CDIFF among current CALNOC participating facilities only.

### Award Criteria (all hospitals):

1. Zero infections in all 4 quarters

OR

2. Observed infection rate at/or below the 25<sup>th</sup> percentile in CALNOC distribution for the high and low categorization groups.\*

\*\*High group is defined as ABOVE OR EQUAL TO 75<sup>th</sup> percentile in CALNOC distribution for central line days (CLABSI), catheter days (CAUTI) and patient days (MRSA and CDIFF). Low group is defined as BELOW 75<sup>th</sup> percentile.
