What users are saying...

"Sam Huffman has been a Microsoft Project expert for many years and one of the best in the industry. Microsoft Project Do's and Don'ts covers the reality of what project managers need to master with Project without getting bogged down in every nook and cranny of the tool."
— *Bill Dow, bestselling author, The PMO Lifecycle: Building, Running, and Shutting Down*

"This reference is a great resource to those that are new to MS Project and even to those that are old hands. Even as a daily user I have referred to this document to refresh my memory and help break old habits. Definitely worth having this resource guide if you use MS Project."
— *Michael Swift*
