### **New EagleView App Update Expands Beyond Roof Measurement Reports**

*New app features provide roofing contractors with tools to boost bidding process*

**Bothell, WA (October 03, 2018)** – Eagle View Technologies (“EagleView®”), the leading provider of property intelligence for government, insurance, and commercial sectors, has released its newest update to the EagleView App, available for download on both the [iOS App Store](#) and on [Google Play](#). The new EagleView App features include automated quoting for job estimates as well as an interactive 3D visualizer enabling a 360-degree view of the property.

The EagleView App is currently used to order, view order status, and access [property measurement reports](#) anytime, anywhere. With this new update, users can now take the guesswork out of estimating by setting customized job cost and pricing preferences, and generating an automated quote for every report order placed.

“With every update we make to our technology and offerings, we continue to revolutionize the roofing industry,” stated EagleView CEO Rishi Daga. “The addition of automated quoting gives our customers the ability to take time-consuming manual processes out of the bidding stage so that they can focus on customer experience instead.”

In addition to the automated quoting feature, the EagleView App now offers users an interactive 3D visualizer. This visualizer allows roofers to see the property and its measurements in a three-dimensional model. Users can pinch, expand and rotate the property image for a complete view.

The EagleView App is available for update on the [iOS App Store](#) and for download on [Google Play](#).

EagleView will continue to release additional updates to the EagleView App for both iOS and Android users.

For more information regarding the EagleView app update, please contact Melissa Mazurek at (585) 444-2504 or [melissa.mazurek@eagleview.com](mailto:melissa.mazurek@eagleview.com).

#### **About EagleView**

EagleView is the leading provider of high-resolution aerial imagery, property data analytics and structural measurements for government agencies, insurance carriers, roofing contractors and energy utilities. Using patented image capture techniques, 3D aerial measurement software and machine learning processes, EagleView helps customers answer questions related to millions of properties throughout the world. With a 60-petabyte library of oblique and orthogonal Pictometry® aerial imagery dating back to 2001 and the capacity to process tens of thousands of roof measurement reports per day, EagleView enables organizations to reduce field visits and adopt faster, safer and more cost-effective workflows. For more information, contact (866) 659-8439 or visit [www.eagleview.com](http://www.eagleview.com).
