## RECORD

Use passive or active RFID, barcode, or GPS information to record asset location data.

## TRACK

Track an asset's Last Known Location or use movement history to make business decisions.

## FIND

Use captured data and a mobile device's RFID capability to quickly find missing assets.

- **Find assets faster.**

Leverage the Last Known Location function with CDO CATS and use RFID technology to zero in on missing assets fast.

- **Go mobile.**

CDO CATS can be used online or offline. No WiFi necessary. Use scanners to capture location data or find assets, then sync with the server when reconnected.

- **Access data anywhere.**

Use the browser-based app to access cloud or on-premise asset data from any authorized device.

- **Improve accuracy.**

Use barcodes, active or passive RFID or GPS to automatically identify products efficiently.

- **Import & export quickly.**

Securely exchange data with Enterprise Resource Planning, financial, manufacturing and maintenance systems.

# CDO CATS

is not a one-size-fits-all product, but it's the **right** solution for your company.
