# MyTana Releases Cable Machine Technology Poster

*Illustrated giveaway details the various styles and options for cable machines.*

ST. PAUL, MN—October 22, 2018— MyTana, a manufacturer of drain cleaning, maintenance and inspection tools for the plumber and drain cleaning markets, has released a cable machine technology poster. This poster illustrates the components of drain cleaning cable machines and breaks down the advantages of various models to help plumbers and drain cleaners understand how their designs affect power, portability and usage.

Cable machines come in a variety of sizes and styles from many different manufacturers. Understanding why equipment was designed the way it is can help operators make more informed purchasing, use and maintenance decisions. This poster covers details such as safety features and cable choice and includes a handy style selector questionnaire relating to common use situations.

“There are dozens of cable machine manufacturers out there, each with their own product lineup,” says Katie Breeden, marketing associate for MyTana. “Each manufacturer makes their machine slightly different and more or less suited for different applications. The best plumbers understand that using the right tool for the job is the most efficient way to work, and that includes using the right cable machine.”

Free copies of the poster are available to the public at [inbound.mytana.com/cable-machine-technology-poster](http://inbound.mytana.com/cable-machine-technology-poster). This poster was created as part of MyTana’s ongoing commitment to provide practical tools for plumbers and drain cleaners, from pipe jetters and cable machines to business planning resources.

## About MyTana Manufacturing
