

CareTeam: Connecting the Senior Care CONTINUUM

CareTeam is the first to market with a secure solution that bridges the gaps in communication and operations between on-site and off-site Senior Care medical professionals.

CareTeam provides better patient population insights for Practitioners, Nurses, through episodic documentation, MDS analysis and reporting:

Enhance Patient Care

Patient-Driven Payment Model (PDPM) Support

Improve Nursing Team Work Satisfaction

Manage Change of Conditions

Optimize Reimbursements

Prevent Rehospitalization

Boost 5-Star Rating

Filter Reports by DOS

Patient Information

Date of Service & Provider

Status: Signed vs Unsigned

- Eliminate the frustrating paper chase!
- Concerned your team is missing important 5- day, 14-day, 30-day, 60-day, and 90-day scheduled assessments?

Now Nurses, MDS Coordinators, and Medical Directors can immediately view the physician's encounters, enabling easy access to:

Data Analysis

No-Charge patient analytics - without the delay!

Unlike like other analytic systems, CareTeam provides your team with timely business intelligence, at no additional cost! Identify areas of improvement and analyze:

- ✓ Rehospitalization Rate
- ✓ Patients at Risk
- ✓ Frailty Indices
- ✓ Medicare vs. Medicaid Breakdown

CareNote is a clinical messaging and documentation platform designed specifically for Skilled Nursing Facilities. CareNote makes it easy for SNF Nurses to continue collaboration and manage change in conditions with mobile practitioners. Now the entire Care Team can send messages, stay informed, and manage patient care.
