

THE MOBILE EHR SOLUTION FOR LONG-TERM/ POST-ACUTE CARE PRACTITIONERS

Save time & increase practitioner productivity. Deliver a higher quality of patient care. Capture important CMS-related requirements.

MEDICAL CHARTING DESIGNED TO MATCH YOUR WORKFLOW.

GEHRIMED's predictive templates are designed specifically for LTPAC practitioners, not retrofitted to other healthcare processes. A built-in Census Manager provides you with a complete, real-time view of your clinical dashboard, enabling at-a-glance access to patient/encounter searches, unsigned encounters, patient census by facility, clinical measures and more.

GEHRIMED's sophisticated features streamline data entry so you can focus on providing care, not chasing paperwork or struggling with technology. Your entire encounter sequence is part of a logical progression that matches the LTC workflow and requires no complicated workarounds for data entry that doesn't apply to your field.

Learn why the most effective LTPAC practitioners rely on GEHRIMED to provide a higher-quality and safer level of care, earn more revenue, and reduce administrative work. Here's what GEHRIMED clients are saying: bit.ly/gehrimedclients

FAST. ACCURATE. COMPLIANT.

I tell doctors GEHRIMED is by far the best EHR in nursing home environments. It is designed the way doctors want it done. This is the main reason, by far, why it's best the EMR in the post-acute environment.

– Doug Nelson, MD

MIPS SUPPORTED PLATFORM

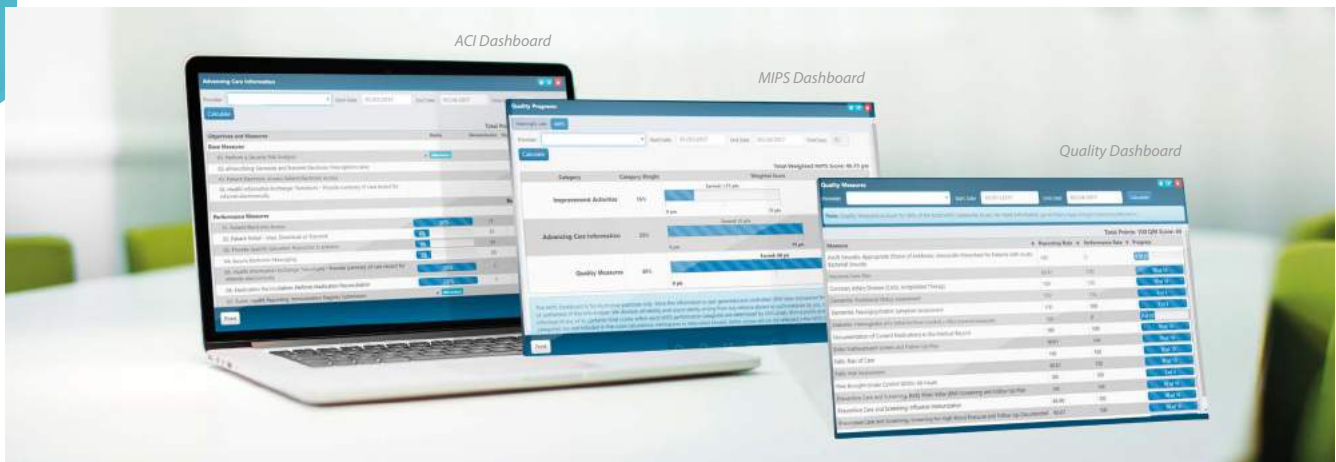

ACTIVATED ALERTS

Alert notifications for Quality Measures associated with the MIPS program notify you when the patient qualifies for further evaluation and when you should take action.

MIPS DASHBOARDS

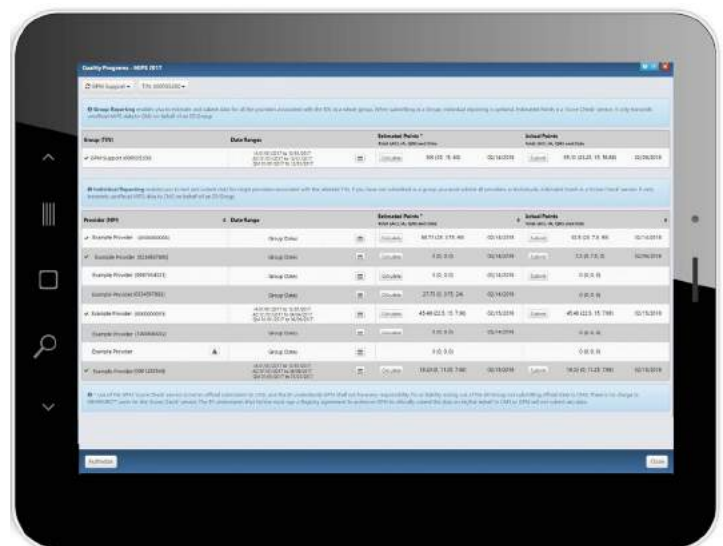

Now you can track your MIPS progress with the GEHRIMED MIPS Dashboards. The MIPS Dashboards are easy-to-manage tools that allow you to track your progress in the following MIPS categories: Advancing Care Information, Quality, Improvement Activities, and a MIPS overview dashboard.

MIPS DASHBOARDS FOR A VISUAL REPRESENTATION OF YOUR PROGRESS

MIPS SCORE CHECK

Now Practitioners and Groups have unlimited access to CMS's MIPS Score Calculator to unofficially send data and preview their MIPS score free of charge. GEHRIMED enables practitioners and groups to test submission data and receive an estimate score that will provide some insight into your final submission score. Calculating Estimated Points is free of charge and is not recorded by CMS.

FACILITY INTEGRATIONS

For additional information visit:
www.gehrimed.com

Real-time patient data exchange between the medical practitioner's EHR (GEHRIMED) and the facility's EHR

More effective transitions of care and better clinical outcomes for seniors

A continuum of care between Medical Practitioners and the Facility

Secure/trusted network for data exchange

Population Health Management and Quality Programs

Seamless EHR interoperability connects you to the entire care continuum. GEHRIMED's ONC-certified solution provides you with complete interoperability, allowing you to chart in one application while updating your patient's electronic health record simultaneously in the GEHRIMED and facility EHRs.

Real-time patient data supports your critical, clinical decisions that enhance patient outcomes and the level of your team's care. GEHRIMED eliminates the need for face sheets, providing medical groups with a head start on verifying insurance.

The integration and interoperability of GEHRIMED has significantly improved our physicians' workflow and increased productivity across the board. Encounter documentation is taking less time and is available to the entire facility clinical care team. This has improved the quality of care and clinical decision making.

-Jean Yarnell, Sr. Director Product Management, Genesis Healthcare

SECURE MOBILE EHR

Secure access to real-time records, wherever your practice takes you. GEHRIMED is designed to protect patient information and streamline your workflow, whether you practice in one facility or many. Cloud storage enables your team's secure access to patient records anywhere and anytime, creating more coordinated, efficient care. Digital patient record-keeping means you never have to fear lost, misplaced or illegible notes.

Frequent backups, coupled with dual authentication and encryption factors, protect you from data loss or security breaches. Internet "dark" protection ensures that encounters remain active without a connection for 15 minutes, so weak signal issues will not affect your productivity. Tiered permissions allow only authorized users to access patient protected health information (PHI), and the system tracks all user activity down to the second.

PRODUCT MATRIX

Different practitioners have different needs. GEHRIMED works great on its own, but can be customized with these additional features:

- > Dragon Medical Speech Recognition
- > e-Prescribing
- > Billing Solutions
- > e-Fax
- > e-Charting
- > LTC Practice Management Tools
- > Customized Reports
- > Chronic Care Management (CCM)
- > HIPAA Compliance Advisory Services
- > Analytics Solutions

$$\boxed{\text{Speed}} + \boxed{\text{Accuracy}} + \boxed{\text{Compliance}} = \boxed{\text{Improved Profitability}}$$

DESIGNED BY LT/PAC PRACTITIONERS FOR LT/PAC PRACTITIONERS

GEHRIMED BY THE NUMBERS

- 01 > 3 Million Encounters Yearly
- 02 10, 000+ Users
- 03 Nearly 11,000 Facilities
- 04 Over 2,500 Practitioners

Hear what our clients have to say about GEHRIMED:

<https://www.gehrimed.com/user-stories/>

Annual User Conferences

Annual User Group meetings that include: Regulatory & Strategy specific tracks, Networking and Collaboration, and announcements of Product Launches and Product Roadmaps.

Client-Specific Webinars

Quarterly client-specific webinars that offer insights & strategy to new & existing regulations.

Clinical Advisory Team

Client (user) advisory panel to identify needs & provide input on the efficiency & effectiveness of GEHRIMED.

In-House Regulatory Team

GEHRIMED's in-house Regulatory Team helps keep practitioners compliant in an ever-changing regulatory environment. From avoiding penalties to earning incentives, GEHRIMED has you covered.

24/7 Technical Support

Trained professionals, based in the United States, provide technical support to users 24 hours a day, 7 days a week.

Being able to see the facility census, and the number of days it has been since a patient has been seen, has led to an increase in revenue.

– Angie Woods, Practice Manager, Barnes Healthcare

HARDWARE AND SOFTWARE REQUIREMENTS

GEHRIMED is a web-based software. Access to GEHRIMED requires a client-based software installation on a desktop, laptop, or iPad. Both the web-based software and client software are frequently upgraded to align with evolving software architecture and security standards, and may require updates to customer devices to reserve adequate security and HIPAA compliance. No

information is stored in the local iPad or computer. Local storage space is minimal and used only temporarily during sessions.

GEHRIMED requires internet connectivity to remain active, although occasional short disconnections are tolerated. Internet connectivity may be via a wired (for Windows) or wireless network or through a Cellular network card.
