MORE THAN PAPER-CRAFT

You're not just getting a set of paper & glue. Building something with your hands effects you on a spiritual level. Mindfulness, appreciation, the satisfaction of completing a hands on project by yourself or with family and friends. Hang it up in your studio, apartment, home, or place of work and get that sense of creative satisfaction every time you look at your masterpiece. Build something unique.

BEST FOR

Families

Artists/Creators

Teens & Children

"The #1 thing I love about building Resident kits is the sense of accomplishment that I finished a kit and added something unique to my home" - Scott

"Some people like meditating, and this I guess is my way of simply not thinking about anything and just relaxing. I find Resident kits therapeutic to build and once they are complete, its like a breath of satisfaction." - Ashlee

about Resident Design

Pittsburgh, PA

412-294-6084

tristan@residentdesign.com

Born and raised in Alaska, design work has always been a part of Tristan's life, making things with his hands since elementary school. Combining his love for architecture, high quality design and paper, Resident Design was born.

With a degree in Architecture, he began working for a few mid-sized startups in 2011. After experimenting with his paper designs until he was satisfied with the quality, he felt confident enough to branch out on his own and pursue his real passion full time. Tristan set out to make paper modeling accessible to all interests and skill levels.

Since it's inception in 2015, Resident Design has fulfilled more than 5,000 orders, filling peoples homes with modern DIY decor. Drawing his inspiration from his customers, he is constantly expanding his product lines to fulfill everyone's wildest paper craft dreams.

Tristan envisions his designs as a way to get people away from their desk and to feel the satisfaction of creating something with their hands whether it be alone or as a means of bringing people together. Everyday he works to make everything easier and more fun while keeping the quality of design as high as possible.
