### ABOUT ARTSPLOITATION FILMS

*International Films with an Edge! Artsploitation Films presents intriguing, unsettling, unpredictable and provocative films to an audience long numbed by filmic predictability.*

*Artsploitation connotes that perfect blend of genre/exploitation films with traditional art cinema. So be they international thrillers, blood-spurting horror, art house dramas or just plain weird and wonderful, they are all part of the Artsploitation Films family.*

*You may not like all of what we present but we hope you'll be at least be intrigued into watching.*

### ABOUT FILM FESTIVAL FLIX

*Film Festivals watch 10,000 new movies and series each year, selecting less than 3% for audiences. We love Film Festivals!*

*But the challenge for most people, even Hollywood Insiders, is they cannot spend the money or time to attend many festivals. Even there, its impossible to see more than a fraction of the films screened.*

*For the first time, Film Festival Flix is partnering with festivals and expert curators to provide streaming access to those films through our virtual film festival channels! Choose the channels that interest you, and watch what you want, when you want, how you want!*
