

## PRECISION SOIL AND IRRIGATION MONITORING SYSTEM

Wireless Underground System (WUGS)  
Enables Permanent Installation of Soil Sensors

- Breakthrough WUGS technology enables a permanent installation of soil sensors in ALL crop types
- Lowest deployed cost and lowest total cost of ownership
- No annual installation or removal in annual crops
- Payback period is less than one growing season
- On average, 10% increase in yield, and 20% decrease in input costs
- Permanent installation combined with machine learning enables future closed loop irrigation system capability

**PRECISION SOIL AND  
IRRIGATION MONITORING SYSTEM**

Next generation of  
reliable, accurate  
and affordable  
sensors

**RELIABLE, ACCURATE, & ACTIONABLE:**

Accurate measurements throughout the root zone including soil moisture, soil salinity, and soil temperature.

**GET ACTIONABLE  
RECOMMENDATIONS ABOUT**

When and how  
long to water

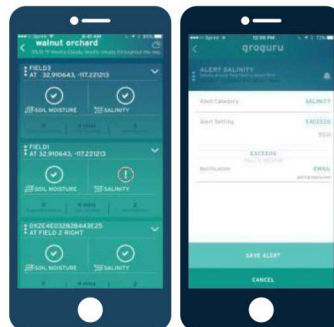

Right Salinity levels  
for your crop

Health of your  
Irrigation System

**DATA, ALERTS, AND ALARMS DIRECT TO  
YOUR SMART PHONE OR COMPUTER**

**EASY INSTALLATION  
LOW MAINTENANCE:**

- Battery operated,
- Multi-year battery life,
- Wireless communications,
- Real-time data
