

Paramount WorkPlace Extends Dynamics 365 Functionality with its Procurement, Requisition and Expense Management Solutions

Advanced integration from Paramount WorkPlace empowers Microsoft Dynamics 365 Business Central users to streamline and simplify spend management

Detroit, MI – December 5, 2018 - [Paramount WorkPlace](#), a leading software developer and provider of cloud-based and mobile spend management software solutions, today announced its integration with Microsoft Dynamics 365 Business Central, an all-in-one business management solution for small to midsize companies. The new Paramount WorkPlace integration makes it simple for organizations to connect and integrate their procurement and expense management tasks with their ERP solution, whether they select an on-premise or a cloud-based deployment.

Paramount WorkPlace's relationship with Microsoft Dynamics solutions dates back to 2000, when the company formed a strategic relationship with Navision, the predecessor of the Dynamics NAV ERP application. When Microsoft took over the Great Plains (GP) product line, Paramount WorkPlace became the first .NET requisition and time and expense management solution to enter the Great Plains (GP) market space. Since that time, Paramount WorkPlace has expanded its offering to include solutions that integrate with Microsoft Dynamics GP, Dynamics NAV, Dynamics AX, and Dynamics SL.

"We continue to look into ways to leverage Microsoft technologies and innovate together," said [Foy Mainor](#), Vice President of Sales for Paramount WorkPlace. "Just as Microsoft evolves its solutions into the next generation of businesses technologies, we are continually innovating our WorkPlace solutions, not just to meet the needs of enterprises today, but to anticipate their needs of tomorrow and incorporate that functionality into our spend management solutions. Paramount WorkPlace uniquely offers Business Central users one solution that offers comprehensive spend management functionality allowing enterprises to streamline purchasing and expense management workflows and bring more spend under direct control."

"Our product development team thrives on introducing innovative technologies that address evolving market requirements, and the [Dynamics 365 integration](#) is evidence of that drive," said [Khensa Bangert](#), Vice President of Marketing and Business Development. "Our customers' business growth and digital transformations strategies continue to steer our product and our company direction. WorkPlace [Procurement](#) and [Expense Management](#)'s out-of-the-box integration with Dynamics 365 Business Central will accelerate the transition of our Dynamics GP, SL, NAV, and AX users into the cloud."

[Mohamed Khalife](#), Director of Product Management at Paramount WorkPlace, said, "Our integration with Microsoft Dynamics 365 Business Central hits all the vital touchpoints enterprises need to drive efficiency and eliminate the need for duplicate data entry. We've designed the interface to function seamlessly and in real time, keeping both applications accurate and up-to-date."
