

SURE, WE COULD

KILL GERMS

PAINLESSLY, BUT WHAT'S

the

FUN IN THAT?

CORPORATE FACILITY SERVICES

FIGHTING FILTH SINCE '66

beelinesupport.com

SOME CALL OCD A PROBLEM. WE CALL IT A QUALIFICATION.

FIGHTING FILTH
since **1966**

A dirty facility means germs, and germs put your employees at risk. With sick days at stake, you want someone with freaky attention to detail on your side. Bee Line Support has provided comprehensive cleaning since 1966. In the battle with bacteria, we're on the front lines.

CORE VALUES

K.A.R.M.A.

- kindness*
- adaptability*
- respect*
- motivation*
- accountability*

Bee Line employees follow the same guiding principles. We believe that a job well done pays dividends – when you look good, we look good. And germs? They'll get what's coming to them too.

OBSESSIVE. COMPULSIVE. DISINFECTION.

We take clean seriously. So seriously that we go to great lengths to give every facility the TLC it deserves.

- 1 We don't subcontract. The people who clean your facility are Bee Line employees, guaranteed.
- 2 We collaborate with clients to ensure that their deepest desires are addressed.
- 3 We use the highest infectious control standards in the industry. Seriously.

YOU'VE HEARD OF GERM WARFARE? THIS IS GERM ANNIHILATION.

Comprehensive cleaning isn't our only service, but it's the one we hang our hat on. Our cleaning standards are designed for hospitals, and we bring that rigor to every facility. Our bacteria-busting professionals clean millions of square feet spanning a range of industries nightly.

CORPORATE

From startups to big businesses, we help offices keep sick days to a minimum.

MEDICAL

When patients need protection, our hospital-grade cleaning standards are just what the doctor ordered.

K-12 SCHOOLS

Where there are kids, there are messes. We foster safe learning spaces for youngsters of all ages.

INDUSTRIAL

Manufacturing facilities get heavy-duty dirty. We crack down on grime to keep things running smoothly.

GREENGUARD® CERTIFIED

All of our buildings are eligible for GREENGUARD® Certification, which signifies the world's most rigorous standards of indoor air quality.

WE KEEP EMPLOYEES SAFE AND MAKE BACTERIA SORRY.

Making germs say uncle is what we do, but protecting your employees is why we do it. Our green cleaning program improves the quality of your environment. Armed with HEPA filter vacuums, Green Seal-certified disinfectants and microfiber towels, we put safety and sustainability first.

"CRUEL AND UNUSUAL" DOESN'T APPLY TO MICROBES.

Our quality control ensures that your facility is as clean as possible. That's good news for your image, and bad news for bacteria.

- ✦ Every facility gets a set of equipment that won't be used anywhere else.
- ✦ Onsite training ensures that our employees know your building like home.
- ✦ Routine management inspections let us get ahead of any issues.
- ✦ State-of-the-art work order system streamlines communication.

“

WE HAD AN UNEXPECTED CRISIS AT 2:00 AM. A PIPE BURST. BEE LINE SENT AN EMERGENCY SERVICE TEAM AND WE WERE ABLE TO OPEN OUR DOORS FOR BUSINESS THE NEXT DAY.

CARRIE S., CLIENT ”

**SAFETY HAZARDS
DON'T SLEEP.
NEITHER DO WE.**

Surprise spills and monumental messes don't confine themselves to the 9-to-5. When something goes "splat" in the night, we provide 24/7 emergency services to keep it under control. Just call 847.556.5256 and we'll deploy a team with equipment at the ready.

GERMICIDE IS JUST THE BEGINNING.

In addition to comprehensive cleaning, we provide a variety of other facility services:

- ✦ Maintenance services
- ✦ Floor care and matting
- ✦ Construction cleanup
- ✦ Full line of building supplies
- ✦ Engineering services
- ✦ Disaster restoration
