MyTana Introduces New M745 Workhorse, First Drain Machine with Variable Speed and Torque Protection.

Groundbreaking design offers enhanced productivity and safety for drain cleaning professionals.

ST. PAUL, MN—January 22, 2019—MyTana, a manufacturer and distributor of cleaning, maintenance and inspection tools for the plumber and drain cleaning markets, has released the new M745 Workhorse drain machine. With MyTana's new M745 Workhorse, drain-cleaning professionals can now adjust cable speed on-the-fly for maximum performance, and choose among two torque settings for safety.

The M745 incorporates MyTana's proprietary new SmartDrive technology. With SmartDrive, cable speed can be throttled (up to 300 rpm) to negotiate turns, strengthen cleaning force, and expedite feeds and retrievals—or reduced (as low as 100 rpm) for tackling obstructions and debris. SmartDrive also includes calibrated torque protection which is designed to safeguard the operator and extend the life of the machine's cable. SmartDrive sounds an alarm when cable torque approaches unsafe limits and then automatically cuts power when that limit is reached.

The limit can be set high for large drains or low for sink lines. Operators can also select how tension is released: quickly with little resistance, or slowly with more resistance.

A versatile machine, the M745 comes fully equipped to work in 3"-4" lines with 100' of cable, slip-joint fittings, autofeed, blades and accessories. A sinkline kit is available to address 1 ½"-2" lines, and no tools are needed to swap reels due to the quick-release design of the drive system.

The M745 is compact to fit in tight spaces, has non-skid feet and balanced weight for stabilization during operation and transport, offers a telescoping adjustable handle that retracts easily for storage, and has built-in stair-rollers for enhanced mobility.

“This new M745 Workhorse gives control to sewer and drain cleaning professionals that is unprecedented,” says Dale Graber, general manager for MyTana. “The M745 is a high-performing machine that saves time and money by working more quickly and accurately, and in turn, protects the safety of the operator and the longevity of the cable.”

The M745 Workhorse with SmartDrive is available through the MyTana website at www.mytana.com/throttle or call 1-866-327-7176.

About MyTana Manufacturing

St. Paul, Minnesota-based MyTana is a full-service manufacturer of drain cleaning and inspection equipment, including cable machines, drain jetters and plumber cameras.
