

## **Globanet Launches Data Capture for Archiving and eDiscovery Solution for Microsoft SharePoint™**

Merge1™ Has Added Microsoft SharePoint™ to its Capture Platform

**Los Angeles, Calif. - January 21, 2019** – Globanet, a worldwide leader in providing comprehensive information governance solutions for data capture for archiving, compliance and eDiscovery, today announced the launch of Merge1™ for Microsoft SharePoint™, the leading browser-based collaboration and document management platform from Microsoft joining other Merge1 source capture connectors for Microsoft already in use by several Fortune 500 companies such as Microsoft Teams™, Skype for Business™ and Yammer™.

Merge1 for Microsoft SharePoint joins the over 80 data types that Globanet's Merge1 data capture for archiving platform currently supports, which include enterprise file sharing and collaboration platforms, social media, financial data tools and SMS/Text.

Mutual customers get the benefits of collaboration and document management while meeting the strict recordkeeping and supervision requirements of organizations in regulated or non-regulated industries looking to capture these communications and utilize their current archive platform. SharePoint Online communications are automatically indexed and immutably retained as they are ingested into any archiving platform where they are stored in a search-ready state for compliance, e-discovery and legal purposes.

“Globanet customers can now capture SharePoint via Merge1 as part of a holistic compliance and legal strategy,” said David Scott, Director of Product Management for Veritas. “Joining forces with companies like Globanet allows us to better serve our customers in highly regulated industries.” For example, financial services customers can get the benefit from SharePoint using Merge1 while still ultimately storing all content into Veritas Enterprise Vault™ to comply with regulations like the Securities and Exchange Commission's [17a-4](#) rule.”

“Our goal is to enable companies to communicate and collaborate the way they want, while staying compliant and ready to respond to discovery events,” said Nini Yarmo, Director of Products at Globanet. “Microsoft ShareFile is in demand because it allows people to harness the power of the entire Microsoft Office 365 portfolio and utilize SharePoint to sync and share enterprise files everywhere, across all personal and mobile devices, while giving IT all the control it needs. We're thrilled to extend the benefits of Merge1 to support Microsoft SharePoint content for our customers.”
