What is a Kickstarter Crowdfunding Campaign?

Crowdfunding is a well-known and documented practice of pre-funding a product/service through the process of launching a “crowdfunding campaign,” which raises small amounts of money from a large number of future customers by pre-selling products called rewards or perks. Order a Kupper Mounts Bike Carrier today and you’ll receive it around August 2019.

The Benefits of Placing a Crowdfunding Order

Customers that purchase a Kupper Mounts bike rack through the crowdfunding campaign will be the very first people worldwide to receive one. Placing an order is very similar to buying any product online. You purchase a Kupper Mounts bike rack online with a valid credit card via the crowdfunding campaign on Kickstarter.com. Once the Kupper Mounts start rolling off the manufacturing production line, which usually has a little bit longer shipping time because it will take around 3 months to get the manufacturing line set up and tooled, they are shipped to the bike store’s location or your home.
