## **Empower Business Solutions Milestone: 30 Years of Implementing ERP Software Solutions**

**Altoona, PA | January 2019** - 2019 marks the 30th anniversary for Empower Business Solutions, one of the regions only dedicated ERP software providers. Empower has grown into a regionally recognized leader for companies needing ERP solutions and a dedicated team to implement them.

Company President, Joe Hasson stated: "We have achieved this milestone through the hard work and enthusiasm of our team members and our hands-on regional customer service. We have committed ourselves to 30 years of understanding what it takes to successfully deploy ERP systems, which can operate and grow a business."

"In 2019, we will leverage this experience into our new division, Empower ERP Consulting. [Empower ERP Consulting](#) will be working with upcoming and established businesses to develop their "ERP blueprint" enabling them to determine the best route for system changes and improvements. As companies expand, their outdated or homegrown systems tend to hold back growth. Decisions around changing the ERP system are often made in a vacuum; bringing in outside help makes these initiatives more approachable and achievable. This new division allows us to consult with businesses *before they commit to fully investing in ERP software*. Companies will then be able to choose to work with our solutions division or to select a solution from an outside vendor that best fits the blueprint created."

To schedule with the consulting division go to <https://em-powered.com/erp-consulting>.

### **About Empower:**

Empower Business Solutions has been helping small and midsize businesses select and implement ERP software for 30 years. Empower Business Solutions is a Gold Certified Acumatica Cloud ERP partner and a Microsoft Dynamics GP (Great Plains) partner. Whether customers are outgrowing an accounting system like QuickBooks, are tired of rubber-banding an old legacy system, or want an active partner that does more than just collect a yearly maintenance fee – [Empower has the people](#) and the resources that can help. Their dedicated team has the knowledge to guide your company through choosing the right ERP system, overseeing the implementation project and meeting your business requirements.
