ValvTechnologies to Host International Technical Conference and Users Group in Middle East

HOUSTON, TX. – ValvTechnologies, Inc., the global leader in the design and manufacturing of zero-leakage high-performance isolation valve solutions, is pleased to announce that its International Technical Conference and Users Group (ITC Middle East) will take place March 12-13, 2019 in Abu Dhabi, UAE.

ITC Middle East is a rare opportunity to bring together the best and most experienced valve industry professionals and application experts in an intimate setting to collaborate, share solutions and discover new technologies from other users, engineers and industry professionals.

Abu Dhabi will mark the first time the conference has been hosted in the UAE. Open to all ValvTechnologies' customers, distributors and representatives from around the world, ITC Middle East will focus specifically on unique market opportunities, challenges and needs of power and oil and gas customers in the Middle East region.

Designed to address regional market's challenges, ITC Middle East will provide useful information for practical application. From group and breakout sessions as well as interactive forums, attendees will leave the conference highly motivated and better equipped with the knowledge to improve business operations.

For additional information or to register, visit: <http://www.cvent.com/d/7bqyyh>
For questions, email: marketing@valv.com

ValvTechnologies invites all industry experts to submit their original and innovative topics for presentation at ITC Middle East. Experience reports, case studies and other types of studies that provide interesting and compelling solutions are well suited for this conference. The deadline to submit abstracts for review is February 8, 2019. To begin the submission process, visit: <http://info.valv.com/itc-me-2019-presentations-0>

About ValvTechnologies

Founded in 1987 and headquartered in Houston, Texas, ValvTechnologies is the leading manufacturer of zero-leakage, high-performance isolation valve solutions providing an unsurpassed level of severe service isolation services and reliability to customers in the fossil power, nuclear generation, upstream oil and gas, downstream and chemical processing, mining and minerals, pulp and paper and other specialized industries.
