## Ubisec Systems, Inc. Recognized for Excellence in Managed IT Services

Los Angeles, CA, February 19, 2019 – Ubisec Systems, Inc. (Ubisec) announced today that CRN<sub>®</sub>, a brand of The Channel Company, has named Ubisec to its 2019 Managed Service Provider (MSP) 500 list in the Security 100 category. This annual list recognizes North American solution providers with innovative approaches to managed services. These services help customers improve operational efficiencies, maximize return on IT investments, and continuously help them navigate the complexities of IT solutions.

Managed service providers are integral to the success of businesses everywhere. They empower companies to implement and operate complex technologies while staying within their budgets and keeping focus on their core business. CRN's MSP 500 list identifies the most groundbreaking managed service organizations, with advanced solutions that have endless potential for growth.

This annual list is divided into three categories: the MSP Pioneer 250, recognizing companies with business models weighted toward managed services and largely focused on the SMB market; the MSP Elite 150, recognizing large, data center-focused MSPs with a strong mix of on-premises and off-premises services; and the Managed Security 100, recognizing MSPs focused primarily on off-premises, cloud-based security services.

Ubisec was chosen as one of 100 premier Managed Security Services Providers (MSSP) in North America for its leadership in IT Security solutions and services as well as for its impact on the Managed Security Services Provider industry.

"Capable MSPs enable companies to take their cloud computing to the next level, streamline spending, effectively allocate limited resources and navigate the vast field of available technologies," said Bob Skelley, CEO of The Channel Company. "The companies on CRN's 2019 MSP 500 list stand out for their innovative services, excellence in adapting to customers' changing needs and demonstrated ability to help businesses get the most out of their IT investments."

"Organizations must be committed, aggressive and vigilant in thwarting Cyberthreats, because in today's frenetic digital climate, it's only going to get tougher to effectively combat the ever-evolving threat landscape," says Edward Sohn, President/CTO of Ubisec. "It's absolutely critical to incorporate intentional security strategies, practices and awareness in all facets of an organization's digital strategy, right from the beginning," says Sohn.

"We are grateful to be named to CRN's MSP500 list in the Security 100 category for a 3<sup>rd</sup> year in a row. It proves that our efforts in the IT security and cybersecurity services space are being recognized throughout the industry and that we're moving the proverbial security 'needle' in the right direction," says Sohn. "Whether from our managed network infrastructure, endpoint security, SIEM, BCDR, or vCISO services, this recognition by CRN further validates our expertise, innovation and effectiveness in solving real customer security problems."

The MSP500 list will be featured in the February 2019 issue of CRN and online at <a href="https://www.CRN.com/msp500">www.CRN.com/msp500</a>.
