AE2S Names Jeff Hruby Business Development Director

(Feb. 18, 2019) AE2S (Advanced Engineering and Environmental Services, Inc.) announces the promotion of Jeff Hruby to Business Development Director. Hruby has been with AE2S since 2012 serving as the Water Resources Practice Leader, and more recently, also as the firm's Civil Practices Director.

“The Business Development Director is responsible for ensuring AE2S’s growth and stability by ensuring the highest level of client satisfaction, developing strategies and broadening the service and client bases of the firm. Jeff has the attitude, business acumen, and technical knowledge to excel at leadership of the firm’s business development efforts,” says Grant Meyer, AE2S CEO.

“I’m ready to expand my focus on business development to all of our practices, as well as overseeing the implementation of strategic marketing and business plans. We have excellent people at AE2S, and I’m particularly excited about the opportunity to work with them collaboratively across our practices and geographies,” says Hruby.

As a licensed professional engineer, Hruby has helped clients with a wide variety of projects over the course of his 20-year career, ranging from air quality modeling for paper mills to urban stormwater master planning. His experience includes analysis, design, and project management on a wide variety of water resources projects.
