FSR by ENDYMED

Fractional Ablation + 3DEEP Deep Volumetric Heating

Superior Results Fractional Skin Resurfacing by ENDYMED, with unique 3DEEP Smooth Scanning technology, provides the ultimate in skin resurfacing and rejuvenation, wrinkle reduction, tightening and scar reduction treatments. The FSR applicator combines superior fractional ablation with 3DEEP volumetric heating for the most effective and easy treatments, particularly in delicate-skin areas, such as around the eyes, mouth and décolleté.

The FSR Advantage:

- Superior depth of penetration – at 2.9mm, the best in the industry
- Fully customizable treatment parameters provide complete control of ablation and coagulation capacity
- Clinically proven efficacy, with consistent superior results
- Minimal to no downtime after treatments
- Provides both immediate and long-term results that continue to improve the skin by collagen remodeling for up to 3 months after the last treatment
- Largest variable treatment area in the industry for maximum coverage with minimal discomfort
- Safe for all skin types

FSR treatments by ENDYMED provide easy and comfortable treatments with **exceptional results**

FSR treatments can also be offered in flexible combination treatment protocols together with ENDYMED's Intensif RF Microneedling treatments to provide the ultimate in skin resurfacing together with deep wrinkle reduction.

PURE 2.0 + FSR + Intensif RF Microneedling

for the Ultimate Skin Resurfacing Tool

A trio that can't be beat for the ultimate in skin resurfacing and tightening! Fractional ablation and heating from top to bottom, together with Microneedling deep volumetric heating from the bottom up, FSR + Intensif RF Microneedling combination treatments provide effective and complete skin resurfacing on all skin layers.

About **3DEEP RF Technology** by ENDYMED

ENDYMED's 3DEEP technology is the most powerful and focused RF skin technology available today. Unlike Monopolar or Bipolar RF technology, which is more superficial and can often be painful or risky to the epidermis, 3DEEP delivers controlled energy deep into the dermis, reaching therapeutic temperatures of 52°-55°C, with minimal epidermal heat and without the need for cooling the epidermis. This is achieved through gently focusing the device energy into the dermis for optimal, painless collagen remodeling. ENDYMED's 3DEEP technology incorporates real time skin impedance monitoring, providing the most optimal energy to the treatment target area by making continuous adjustments based on the tissue impedance over the current treatment area.

About **ENDYMED MEDICAL**

ENDYMED MEDICAL, established in 2007, offers energy based medical aesthetic treatment systems for both the professional and consumer markets. ENDYMED's proprietary, FDA cleared 3DEEP® radiofrequency technology is a highly effective solution for non-ablative and fractional wrinkle treatment, RF Microneedling, skin tightening on the face and body, body contouring, circumference and cellulite reduction, and acne and traumatic scar treatment.

ENDYMED's unique, patented 3DEEP technology delivers RF energy 3 layers deep into the skin, without any pain or risk, reactivating the natural collagen production to remove wrinkles and noticeably lift and tighten the skin.
